

**GOVERNMENT OF ASSAM**

**A  
REPORT  
ON  
CHANGES IN ECONOMIC CONDITION OF  
OPERATIONAL HOLDER SINCE  
1970-71 TO 2010-11  
(UNDER 13<sup>TH</sup> FINANCE COMMISSION GRANT-IN AID)**

**DIRECTORATE OF ECONOMICS AND STATISTICS, ASSAM,  
BELTOLA, GUWAHATI-781028**

## **FOREWORD**

*The Report on “Changes in Economic Condition of operational Holder since 1970-71 to 2010-11” is the first attempt of the Directorate of Economics and Statistics, Assam to provide information on basic characteristics of Agriculture over all the Agriculture Census so far under taken by this Directorate as per guidelines of Government of India. The information incorporated in this publication provides comparable status of each Agriculture Census over the others. Besides this, the Agriculture Census data at all India is also compared with the state. It is expected that the information furnished in the publication will be helpful to various Organisation, Researches, Academician etc.*

*Apart from above, I would like to put on record the team work of the officers and staff of “Agriculture Census Division” in compiling and designing the Report on “Changes in Economic Condition of operational Holder since 1970-71 to 2010-11” whose sincere and incessant efforts make it possible in bringing out the Report.*

*Any suggestion for improvement of future issues of the publication is most welcome.*

*Dated Guwahati the  
3rd September, 2015.*

  
( B. K. Phookan )

**Director of Economics & Statistics, Assam.  
Beltola, Guwahati – 28.**

## **1-Introduction:-**

**1.1-Agriculture Census:-** Agriculture Census is a large scale statistical operations under Central Sector Scheme where detailed quantitative information of the land holding is collected by taking the Agricultural holding as the basic unit of operations. The Census is collected in a phase manner which provides basic data on operational holding viz. Number, Size, Tenancy, Land utilization, Irrigation particulars, Cropping pattern etc. The information so collected is very much useful in the context of various Agricultural related planning where the primary sector of the economy contributes around 18% to the SDP and about 70% population earned their livelihood from this sector.

In the first phase of the Census, a complete enumeration is done to estimate the total number of operational holding and area operated by different size classes social status wise viz. Scheduled Caste Scheduled Tribes, Others and Institutional holdings and gender wise separately.

The complete enumeration is done in case of land record system areas of the State and 20% sample enumeration is done where land record system is not in practice.

The second phase of Agriculture Census is done in 20% sample villages where detailed information regarding the basic structure such as size class, number, tenancy, land utilization ,cropping pattern, crop wise area, Net area sown, Gross area sown, Net and Gross irrigated area and area put to non Agricultural wise etc. are collected for the entire holdings in the sample villages by different size classes and social status wise viz. Scheduled Caste, Scheduled Tribe, Others and Institutional but not by the gender wise classification.

In the third phase, which is called Input Survey, is done in 7% sample villages where information viz uses of various inputs such as chemical fertilizers ,other manures, pesticides, irrigation facilities, Agricultural livestock's, Machineries and Agricultural debt are collected in selected sample holdings in the sample village.

Thus the data collected through the three (3) phases of the Agriculture Census is very vital for analyzing the development of the Agricultural Sector and for formulating various plan and policies for future development.

**1.2- Historical Background :-** The first world Agriculture Census was conducted in the year 1924 by the International Institute of Agriculture (IIA) in Rome. Than after the Food and Agricultural Organization (FAO) of UNO took over the IIA and started to conduct the World Agriculture Census across the countries.

**1.3-Agriculture Census in India :-** The first Agriculture Census with the reference year 1970-71 as a part of the world Agriculture Census programme sponsored by FAO (UNO) was conducted in India.

Presently the Census is done by re-tabulating the land record information maintained by the Revenue Department. In non-land record areas where cadastral surveys are not done the census is carried out through 20% sample survey.

**1.4- Agriculture Census in Assam:-** Agriculture Census in Assam was first carried out during 1970-71 on complete enumeration basis along-with the rest of the Country under the programme of world Agriculture Censuses. Thereafter, Agriculture Census with reference years 1975-76, 1980-81, 1985-86, 1990-91, 1995-96, 2000-01, 2005-06 and 2010-11 were successfully conducted in the State preliminary works for the next Agriculture Census 2015-16 is in progress.

**1.5- Organizational setup:-** Agriculture Census is a Central Sector plan Scheme initiated by the Department of Agriculture under the Ministry of Agriculture and Co-operation, Government of India, and imparted by all the States of the Country.

**1.6- State's set up :-** The Addl. Chief Secretary to the Government of Assam, Revenue & Disaster Management Department is the Agriculture Census Commissioner and is the overall in-charge of the Agriculture Census operation in the State and the also the Chairperson of the State. There is a State Level Co-ordination Committee constituted for the smooth functioning of Agriculture Census and to issue necessary guidelines and to review the progress of the Census work in the State. The Director of Economics & Statistics, Assam is the Member Secretary of the committee. Similarly a district level Co-ordination Committee is also constituted which is headed by the Deputy Commissioner of the concerned district level progress of the census work. The technical portion of the whole census viz. (a) printing of schedules (b) Training to the field staff (c) Scrutiny of filled-in schedules (d) Tabulation of the data and report writing etc. are done by the Directorate of Economics & Statistics, Assam. The Director of Land Record, Assam is responsible for the conduct of field works in the State. Data in respect of the census are collected by the Revenue officials (Lot Mondals) in the plain districts of the State.

In the two Hills Districts, Where land record system do not exist, field work is done by the VLEW's (Village Level Extension Workers) under the direct control of the concerned Block Development Officer.

**1.7- Data Processing:-** The computerized data processing and validation of Tables in respect of Agriculture Census is done by the National Informatics Centre (NIC), Government of India, NIC executed the task of data processing through the DOEACC, Kolkata which is now renamed as the “National Institute of Electronics and Information Technology”(NIELIT). The data processing works of Agriculture Census 2005-06 in respect of the State is done through a local based data processing centre at Guwahati under the guidance of a State Co-ordinator entrusted by the DOEACC, Kolkata but for the Agriculture Census 2010-11 data processing and Tabulation of data is done by the NIELIT Kolkata directly.

**1.8- Analysis of the data:-** The data relating to the structure of operational holdings at Micro and Macro level is very much important for various planning and improvement of the Agriculture sector of the economy. The Census data provides an idea about the change of the characteristics and structures of the Agricultural holding in every five year and gives an opportunity for taking up quality planning model in the Agriculture sector.

## **2-Methodology:-**

Computation and Comprehensive Report on Agriculture Census undertaken by the Ministry of Agriculture, Department of Agriculture & Co-operation, (Agriculture Census Division) Government of India, is one of the largest Statistical Operation Country wide.

Agriculture census in Assam is conducted by re-tabulating the land record information already available in the village Chitha Book maintained by the Revenue Department.

In the two hill district it is done by door to door enquiry method in 20% selected sample villages.

As per the concept and definition of Agriculture Census, efforts are made to obtain the de-facto position rather than the de-jure position of the holders.

- (a) A complete enumeration is done in the first phase to estimate the total number of operational holdings and area operated according to 10 size classes and social status wise and gender wise.
- (b) The second phase of the census is done in 20% sample village where detail information about the structure of Agricultural holding is collected in the following broad groups.
  - (i) Dispersals of holdings by size group.
  - (ii) Tenancy status.
  - (iii) Area under different land use size class wise in 6 fold classification.
  - (iv) Cropping pattern such as cropped once or more.
  - (v) Crop-wise and source-wise area irrigated/un-irrigated size class wise.

The information area collected on social group wise viz. Scheduled Tribes, Scheduled Caste, and Others.

- (c) The third phase which is called as Input Survey, is follow up survey of the main census and is done after once in a year of completion of first and second phase.

The third phase is done by taking only 7% sample village and information is collected in respect of :-

- (i) Parcel wise detail of multiple cropping.
- (ii) Application of chemical fertilizer and pesticides.
- (iii) Live-stocks.
- (iv) Agricultural Machineries.
- (v) Seeds.
- (vi) Agricultural credit and IPM.

### **3-Concept and Definitions:-**

**(a) Operational Holding:-** “All land which is used wholly or partly for Agricultural production and is operated as one technical unit by one person or with others, without regard to the title, legal form, size or location” is called operational holding.

**(b) Technical Unit:-** Technical unit has been defined as that unit which is under the same management and has the same means of production such as labour force, machineries and animal etc.

**(c) Agriculture Production:-** Agriculture production includes growing of field crops such as Rice, Wheat, Rape & Mustard etc. Fruits, Vegetables, production of Tea, Coffee, Rubber, Flowers and Fodder Grass etc.

**(d) Operated Area:-** Operated area includes both cultivated area of a holding. For instances, if an operation holding consist of four survey numbers out of which only one survey number is put to Agricultural uses, the holding is be taken as an Agricultural holding.

The operated area also covered the land occupied by the firm house building including the house of holder provided such buildings are located within the operated area.

If the farm building and the dwelling house of the holder located outside the cultivated area and covered under “Abadi Area” it would not be included in the Agricultural holding as the “Abadi Area” or the homestead land are excluded from the purview of the census.

The Government forest land, common grazing land, Govt. Waste land is also excluded from the Agriculture Census, but the total geographical area of the village is estimated in the schedule 1.3 by comprising all such type of the village.

**The operated area comprise of :-**

- (i) Land owned and self operated.
- (ii) Land leased-in.
- (iii) Land otherwise operated.

**(e) Operational holders:-** An operational holder is the person who bears the responsibility of operating the land holding. He may have taken the responsibilities fully by own or may share it with others.

The operational holding may be:-

- (i) Individual:- If the holding is operated by one person along or by group of same family member it is called Individual holding.
- (ii) Joint:- If two or more person shared jointly to operate the holding mainly sharing the economic responsibility is called joint holding.
- (iii) Institutional:- Farms run by Government or by institutional such as Co-operative farm or managed by trust or Temple etc, is called Institutional holding.

**Resident and Non-Resident operational holders:-** All the Cultivators residing in a particular village and cultivated land within the village they are called resident cultivators of the village. And the cultivators who cultivate some land in the particular village but don't reside in the cultivating village is defined as non-resident cultivator of the village.

**Wholly irrigated, partly irrigated and wholly un-irrigated holdings:-** If the entire net area sown of a holding is irrigated during a year it is called wholly irrigated, if the net area sown is partly irrigated it is called partly irrigated holdings and if the holding did not get any irrigated during the year it is called wholly un-irrigated holdings.

**Land utilization:-** Operated areas are classified in 6 broad categories :

- (a) Net area sown.
- (b) Current fallow.
- (c) Fallow land other than current fallow.
- (d) Other un-cultivated land excluding fallow land.
- (e) Culturable waste land.
- (f) Land not available for cultivation.

**Net area sown :-** Total area sown with crop counting only one time in a year is called net area sown.

**Current fallow :-** The area which were cropped previous year but kept fallow during the reference year is called current fallow. The seeding bed may also be treated as current fallow.

**Fallow other than current fallow:-** Lands which are usually cultivated but due to various reason kept it fallow more than one year.

**Other uncultivated land excluding fallow:-** Permanent grazing land pastures and the land under miscellaneous trees ,groves, bamboo bushes which are uses for fuel purposes but not included in the net area sown.

**Culturable waste:-** Land which are once cultivated but kept fallow for five successive years fall in this category.

**Area not available for cultivation:-** These categories includes forest area, area used for Non- Agricultural use, Barren and un-cultivable land.

**Size classes and broad size groups of holdings:-** Agriculture Census data are presented in the following group (5 broad group):

<u>Sl. No.</u>	<u>Groups</u>	<u>Classes (in hectares)</u>
(i)	Marginal -	{ below 0.50 hectare. 0.50 hectare to 0.99 hectares.
(ii)	Small -	1.00 hectares to 1.99 hectares.
(ii)	Semi-Medium -	{ 2.00 hectares to 2.99 hectares. 3.00 hectares to 3.99 hectares.
(iv)	Medium -	{ 4.00 hectares to 4.99 hectares. 5.00 hectares to 7.49 hectares. 7.50 hectares to 9.99 hectares.
(v)	Large -	{ 10.00 hectares to 19.99 hectares. 20.00 hectares and above.

## **THE MAIN OBJECTIVE OF THE PROJECT :**

The main objective of the project is to study the trend of the series of data of Agriculture Census since 1970-71 to 2010 -11. As the Agriculture Census is a quinquennial Census, the project covers 8 number of the Censuses and 40 years of time period.

To have a picture of different changes in the Agricultural Sector of the country and changes in the different characteristic of the Agricultural holdings and operated area which have taken place during the last 40 years efforts has been made to collect all the data from every possible sources.

In this regard it may be mentioned herewith that we get success in collection of the data from 1975-76 in a complete base but the data for the Agriculture Census 1970- 71 which was the first Agriculture Census conducted in the countrywide manner could not be collected for all the related items and so we have to make analysis in certain item without the data of the 1970-71 census.

The State level alongwith the National level data have been collected for Agriculture Census Since 1970-71 to 2010-11. In this regard it may be mentioned that though to compare the National level data with the State level data is not a reasonable efforts we try only to have a general view of the trend of the data in both State and National level.

## **THE MAIN OBSERVATION OF THE PROJECT :**

**1. Total No. of Agricultural Holding :-** The number of Agricultural holdings reveals an increasing trend since 1970 -71 to 2005 - 06 Census and in the 2010-11 Census a slight decrease in number is observed. (Table-I)

In 1970-71 the total number of Agricultural holdings was 1964 thousand and in 2005 - 06 the total number of Agricultural holdings increased to 2750 thousand number with a difference of about 40% increased since 1970-71 but in Agriculture Census 2010 -11 the number decreased to 2721 thousand number with a difference of 1.05% decrease over the 2005-06 data.

**2. Total amount of operated Area :-**In 1970-71 Census the operated area was recorded as 2883 thousand hectares and gradually maintaining a continuous increasing trend till the Agriculture Census 1990-91 it increased to 3205 thousand hectares of land with 11.17% increasing rate , but from the Agriculture Census 1995-96 to 2010-11 the operated area maintains a continuous decreasing trend from 3138 to 2999 thousand hectares. (Table-II)

The decreasing trend of the operated area may be attributed to the factors such as shifting of cultivated land to other utilisation, conversion of Agricultural land for Industrial purposes. Moreover, with the increasing population the requirement of residential plot also increased and as such area occupied in the existing Agricultural land also contribute in reduction of Agricultural land to some extent.

The another major factor is the constitution and separation of the N.E. State like Meghalaya, Arunachal, Manipur etc. which was originally included in the State of Assam

In the all India level data the picture is something different. In National level the number of Agricultural holdings shows a continuous increasing trend in 1970-71 as it was 70493 thousand but in the year 2010- 11 it increased to the number of 138348 thousand. In the last 40 years of time total number of holdings increased by 67855 thousand numbers over 1970-71 census.

In case of operated area, National level maintains an increasing trend. In 1970-71 Agriculture Census operated area was recorded as 162124 thousand hectares and in 2010- 11 Census it becomes 1595592 thousand hectares with a difference of 1233468 thousand hectares increase over 1970-71 Census.

**The average area per holdings :-** The average area / holding maintain a continuous decreasing trend. In 1970-71 it was 1.47 hectares and in 2010-11 it becomes 1.10 hectares per holdings.

In National level also a continuous decreasing trend observed from 2.30 hectares in 1970-71 to 1.15 in 2010-11 Census. (Table-II)

**Estimated No. of operational holdings receiving irrigation and the area operated irrigated by different sources :-** In the Agriculture Census 1976-77, the irrigational estimated number of operational holders receiving irrigation was recorded as 1,30,000 number with irrigated area of 16,3,000 hectares and in Agriculture Census 2010-11 the total number of holdings received irrigation 1,48,000 number and 1,64,000 hectares area which shows a mixed trend since inception but in all India level it shows an continuous increasing trend both in no and area irrigated.

Regarding the source of irrigation canal shows an increasing as well as the highest source of irrigation. Since 1970 – 71 to 1990 – 91 but in the subsequent Agriculture Censuses, the other source of irrigation occupied the highest source of irrigation.

### **WHOLLY IRRIGATED/UN-IRRIGATED HOLDINGS :**

In case of wholly irrigated holdings alongwith the area observed more or less a decreasing trend and the wholly un-irrigated holdings since beginning showed continuous increasing trend but in all India's level the wholly irrigated holdings since 1970-71 recorded an increasing trend both in number and area irrigated and the wholly un-irrigated holdings recorded almost decreasing trend.

### **ESTIMATED AREA UNDER DIFFERENT LAND UTILISATION :**

**(A) Net Area Sown :-** Net Area Sown showed an increasing trend till the Agriculture Census 2000-01 with 3,0,0,9,000 hectares and in the last 2 number of Census 2005- 06 and 2010-11 the net area sown is recorded as 2947000 hectares and 2908000 hectares respectively. In all India level the land under Net Area sown recorded more or less increasing trend.

**(B) Current Fallow :-** Current Fallow is highest in the Agriculture Census 1980-81 with 40,000 hectares of land and after that shows decreasing trend. It become only 2000 hectares in Agriculture Census 2010-11.

In all India's level the area under current fallow shows almost decreasing trend from 13316000 hectares in 1970-71 decreased to 10,270,000 hectares in 2005-06 and again increased to 11483000 hectares in 2010-11.

**(C) Culturable waste land :-** The culturable waste land also showed continuous decreasing trend in both State and National level.

**Land not available for cultivation :-**This item also maintained a decreasing trend in both National and State level except in 2010-11 in National level data which showed an increasing trend in comparison to the data of 2005-06 .

**Estimated leased in area in terms of leasing :-** The estimated leased in area in terms of leasing reveals decreasing trend in both State and National level observation.

Almost 90% of the total operated area is wholly self-operated area.

### **CROP WISE ESTIMATED AREA AND NUMBER OF OPERATIONAL HOLDINGS BY IRRIGATION STATUS :**

**Rice :-** The area under wholly irrigated area under the Crop of Rice is decreasing since 1970-71 to 2010-11 from 239 thousand hectares to 126 thousand hectares.

The wholly un-irrigated holdings and area recorded increasing trend from 1995 thousand hectares in Agriculture Census 1970-71 to 2881 thousand hectares in Agriculture Census 2010-11.

But in National level the picture is in reversed condition the wholly irrigated holdings showed gradual increasing trend and the wholly un-irrigated holdings along with area showed continuous decreasing trend with 23243 thousand hectares in 1970-71 and 19370 thousand hectares in Agriculture Census 2010-11 .

The total area under the crop Rice in the State maintained an increasing trend from 2234 thousand hectares in Agriculture Census 1970-71 to 2707 thousand hectares in Agriculture Census 2010-11.

In National level the observation showed continuous increasing trend in the area under the crop Rice.

**Total Cereals :-** The area under total cereal shows an continuous increasing trend but the wholly irrigated area recorded more or less continuous decreasing trend and the wholly un-irrigated area increasing in a continuous trend .

In National level the area under the crop total cereal along with wholly irrigated area is in a continuous increasing trend and the wholly un-irrigated area maintained decreasing trend.

**Area under the Crop in Total Pulses :-** The total cropped area under the total Pulses is showing decreasing trend from Agriculture Census 1980-81 and the wholly irrigated holdings and area under the crop is negligible and almost all the area is under wholly un-irrigated status.

In National level the area under the crop along with the wholly irrigated holdings depicted increasing trend.

**Total Vegetables :-** The area under total vegetable maintained increasing trend but with very negligible area under wholly irrigated status .

In National level area under the crop increasing along with wholly irrigated area.

**Rape & Mustard :-** The area under the Rape & Mustard maintained an increasing trend from 130 thousand hectares in 1970-71 to 194 thousand hectares in 1980-81 and then on by maintaining a continuous decreasing trend it comes down to only 58 thousand hectares in Agriculture Census 2010-11 with negligible amount of wholly irrigated area under the crop .

In National level the area under the crop maintained a continuous increasing trend along with wholly irrigated area.

**Total oil Seeds :-** The area under the total oil seeds maintained more or less an increasing trend till the Agriculture Census 1995-96 and then suddenly goes down to 69 thousand hectares in Agriculture Census 2000-01 and it recorded 85 thousand hectares in 2010-11 Census.

The wholly irrigated holdings recorded very negligible amount under the crop Total Oil Seeds.

In National level data the area under the crop total oil seeds along with wholly irrigated holdings recorded continuous increasing trend.

**Total Fibres :-** The total Fibres which contains Jute, Mesta and cotton etc. maintained a continuous decreasing trend with negligible area under wholly irrigated holdings.

In National level data it shows an increasing trend in area under the crop total Fibres along with the area under wholly irrigated holdings.

**The area under the Crop Tea :-** The total number of holdings under the crop Tea shows more or less decreasing trend but the area under the crop along with wholly irrigated holdings showed continuous increasing trend.

In National level the holdings and area under the crop Tea maintained a continuous increasing trend.

**The area under the total Non-Food Crop:-** The area and holding under total Non-Food crop shows more or less decreasing trend.

In National level data it depicted both in number of holdings and operated area a continuous increasing trend.

**A BRIEF COMPARATIVE STUDY OF THE NUMBER OF OPERATIONAL HOLDINGS  
TABLE (I) AND OPERATED AREA TABLE (II) THE AVERAGE AREA PER HOLDINGS  
SINCE 1970-71 TO 2010-11.**

**TABLE – (I)  
NO. OF OPERATIONAL HOLDINGS  
SINCE 1970 - 71 TO 2010 - 11**

Agriculture Census	No. of Holdings (in lakhs)
1970 - 71	19.64
1976 - 77	22.54
1980 - 81	22.98
1985 - 86	24.19
1990 - 91	25.23
1995 - 96	26.82
2000 -01	27.12
2005 -06	27.50
2010 - 11	27.21

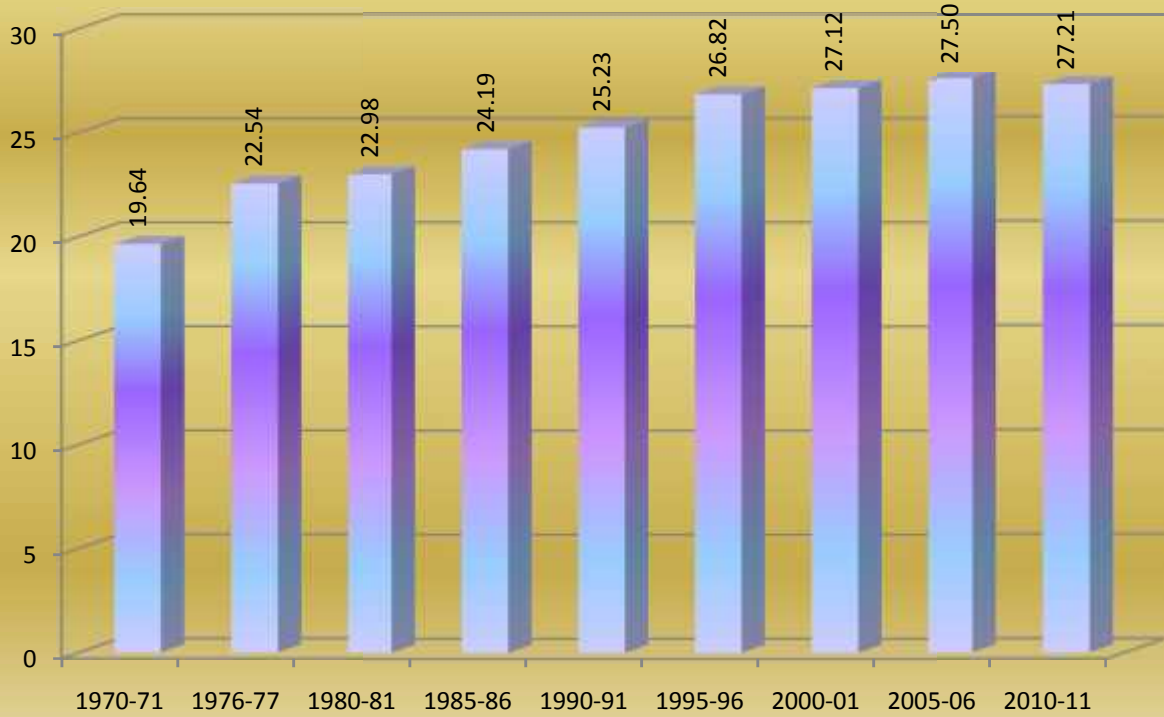

The above table reveals that the number of operational holdings since 1970 – 71 maintained an increasing trend it is mainly due to fragmentation of the operational holdings alongwith the increasing population.

In the Agriculture Census 2005–06 in comparison to the earlier Census the rate of increasing in the number of operational holdings is very low and it is because of shifting of Agricultural land Agricultural sectors and for the same reason in Agriculture Census 2010 – 11 it came down to 27.21 hectares.

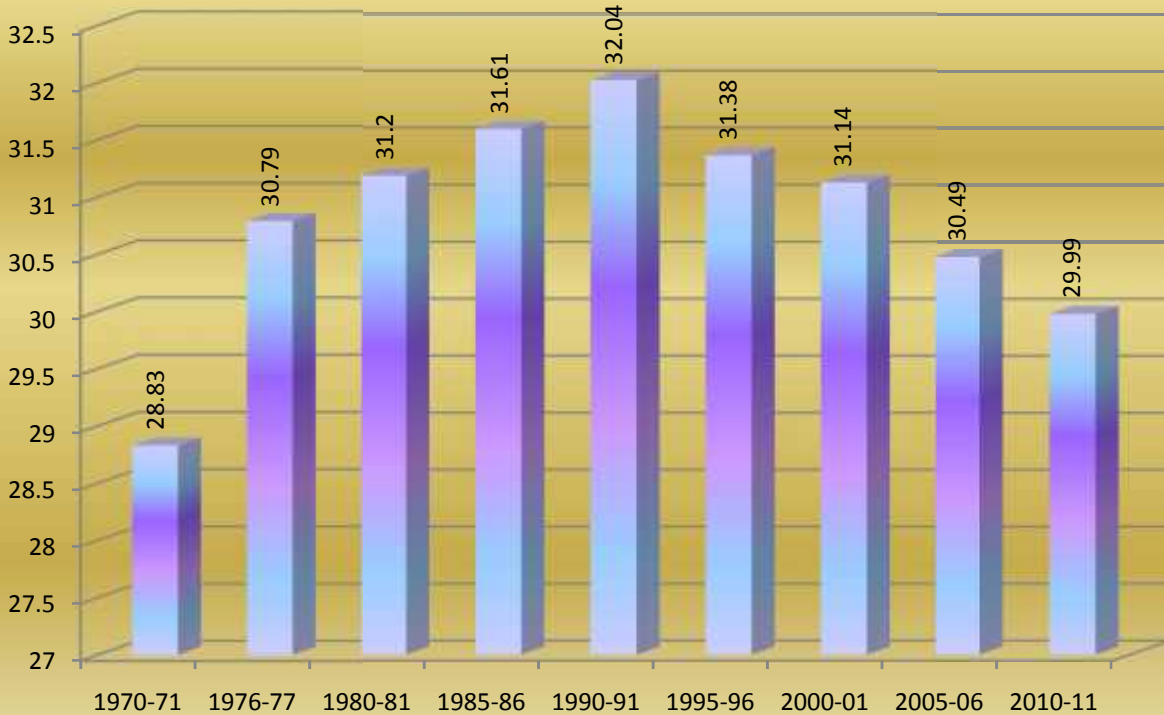

**TABLE–( II)  
OPERATED AREA (IN LAKH HECTARES)  
SINCE 1970 -71 TO 2010 - 11**

Agriculture Census	Operated area (in lakh hectares)
1970 - 71	28.83
1976 - 77	30.79
1980 - 81	31.20
1985 - 86	31.61
1990 - 91	32.04
1995 - 96	31.38
2000 - 01	31.14
2005 - 06	30.49
2010 - 11	29.99

**No. of Operational Holdings since 1970-71 to 2010-11  
(in Lakhs)**

**Operated area (in lakh hectare) since 1970-71 to 2010-11**

The above table represents the area operated under different Agriculture Census since 1970 – 71. It is observed that since 1970 – 71 there is a continuous increasing trend up-to 1990 – 91 Census. In 1995 – 96 the area operated decreased by 0 .76 percent over 1995 -96 and in 2005 -06 operated area decreased by 2.09 percent over 2000-01 Census which is the highest. In 2010 - 11 area decreasing by 1.64 percent over 2005-06.

**Table –( III)**  
**Average size of holdings (in hectares)**  
**Since 1970–71 to 2005–06**

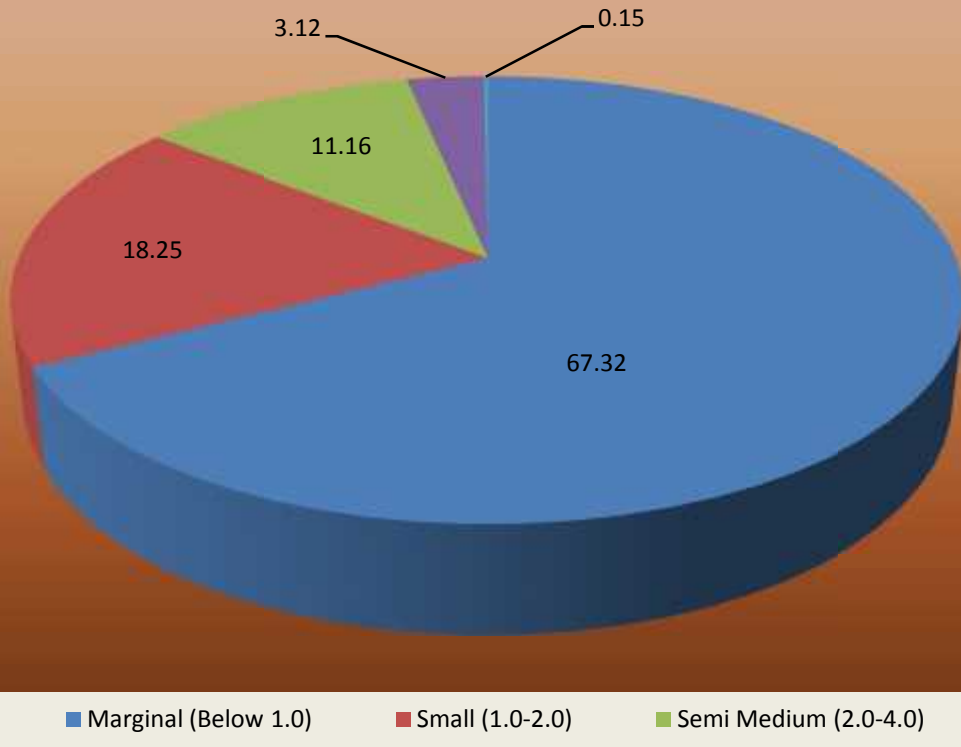

Agriculture Census	Average size of holdings
1970 - 71	1.47
1976 - 77	1.37
1980 - 81	1.36
1985 - 86	1.31
1990 - 91	1.27
1995- 96	1.17
2000 - 01	1.15
5009 - 06	1.11
2010 - 11	1.10

**Table –( IV)**  
**A brief study on concentration of number of operated holdings and area operated as per size class wise distribution in Agriculture Census 2010-11.**

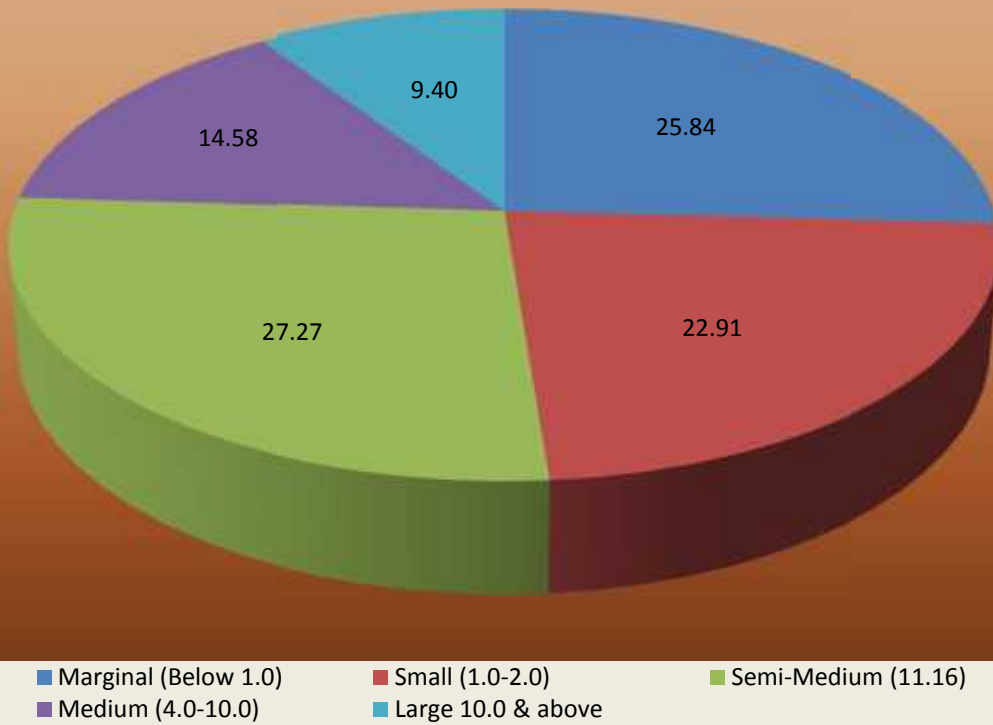

Size groups (in hectors)	Number of holdings	Percentage of Concentration	Operated Area (in hectors)	Percentage of concentration
Marginal (Below1.0)	1831115	67.32	774797	25.84
Small(1.0-2.0)	496574	18.25	687156	22.91
Semi-Medium(2.0-4.0)	303528	11.16	817982	27.27
Medium(4.0-10.0)	84869	3.12	437372	14.58
Large(10.0 & above)	4137	0.15	281763	9.40
All	2750114	100.00	3078543	100.00

The above table reveals the concentration of land holdings in different size groups where Marginal Groups constituted the largest segment of 63.74 percent of the total holdings and in case of the operated area highest concentration is observed in the Semi- Medium Group. The Census also provides information on the status of different social groups of the operation holders. A comprehensive study has been made on the social status of the holders in Agriculture Census 2005-06 over 2000-01.

**Concentration of No. of operated holdings as per size class wise distribution in Agricultural Census, 2010-11**

**Concentration of No. of operated Area as per size class wise distribution in Agricultural Census, 2010-11**

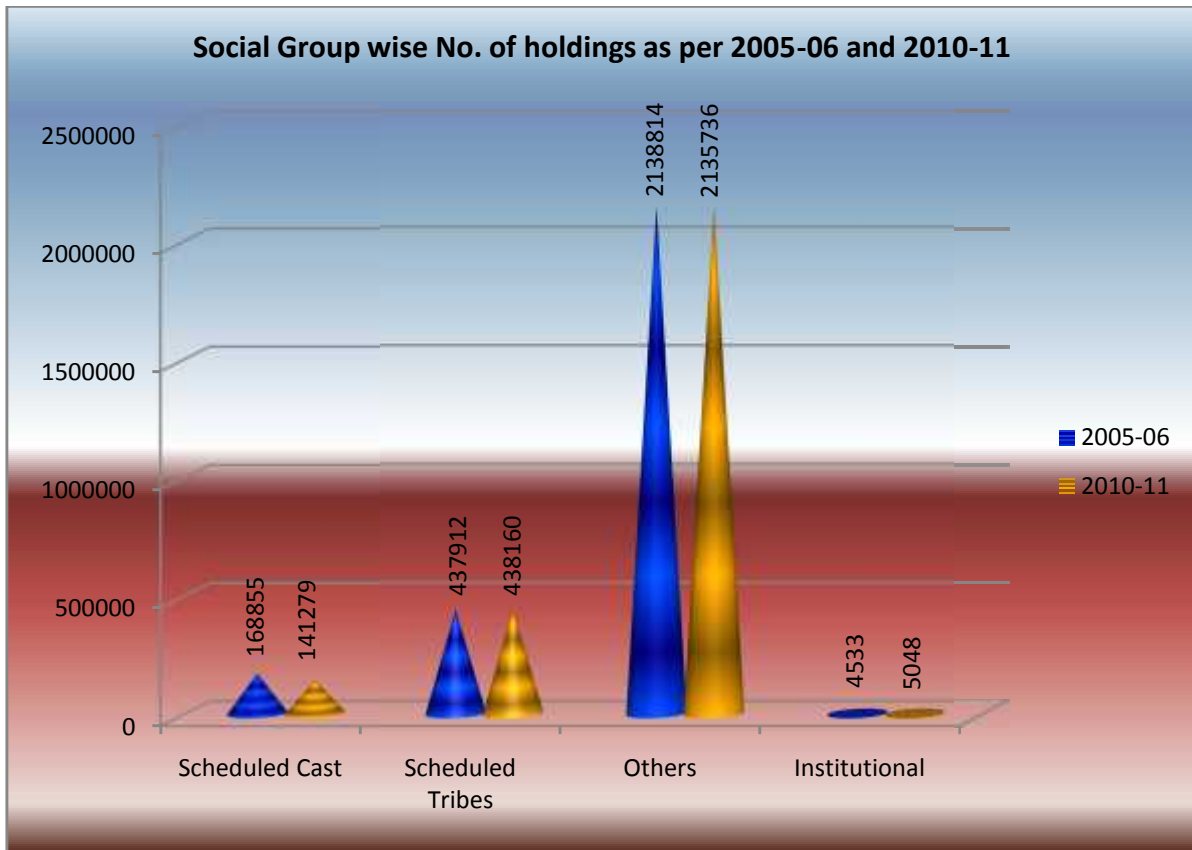

**Table –( V)**

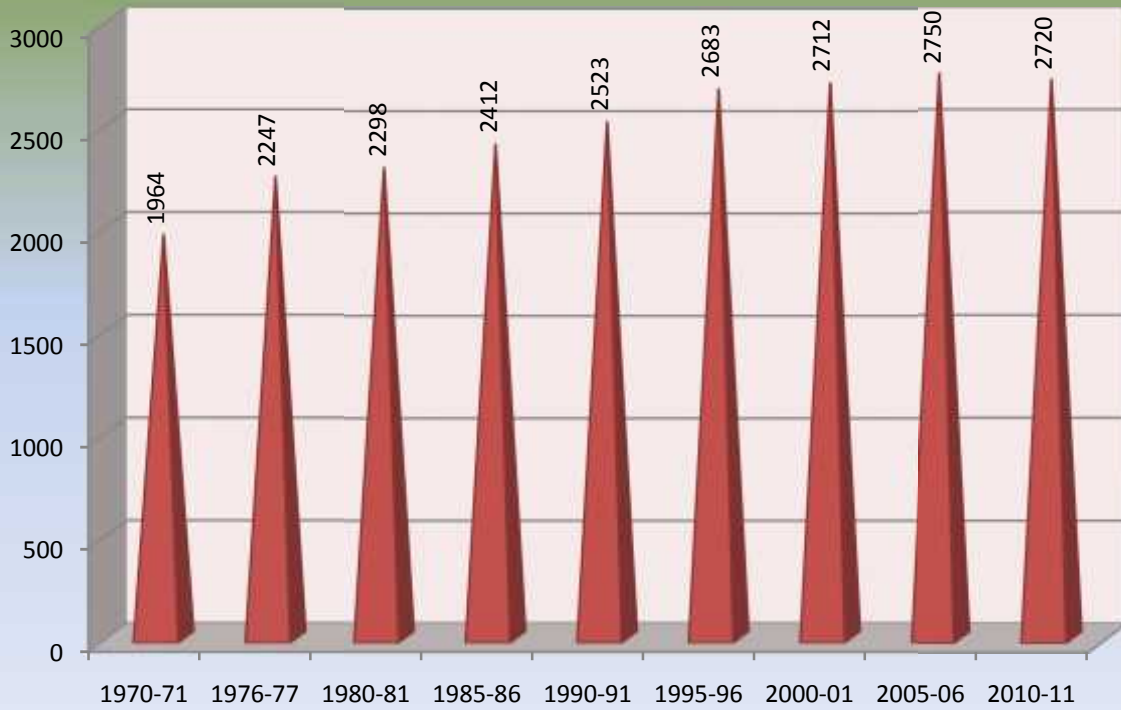

**A comparative study of social group wise number of holdings as per 2005-06 over 2010-11 over 2005-06 Agriculture Census.**

(Social Group)	No of holdings		Percentage Increase/Decrease
	2005-06	2010-11	
Scheduled Cast	168855	141279	(+)20.54
Scheduled Tribes	437912	438160	(+) 10.74
Others	2138814	2135736	(-) 1.61
Institutional	4533	5048	(+) 63.94

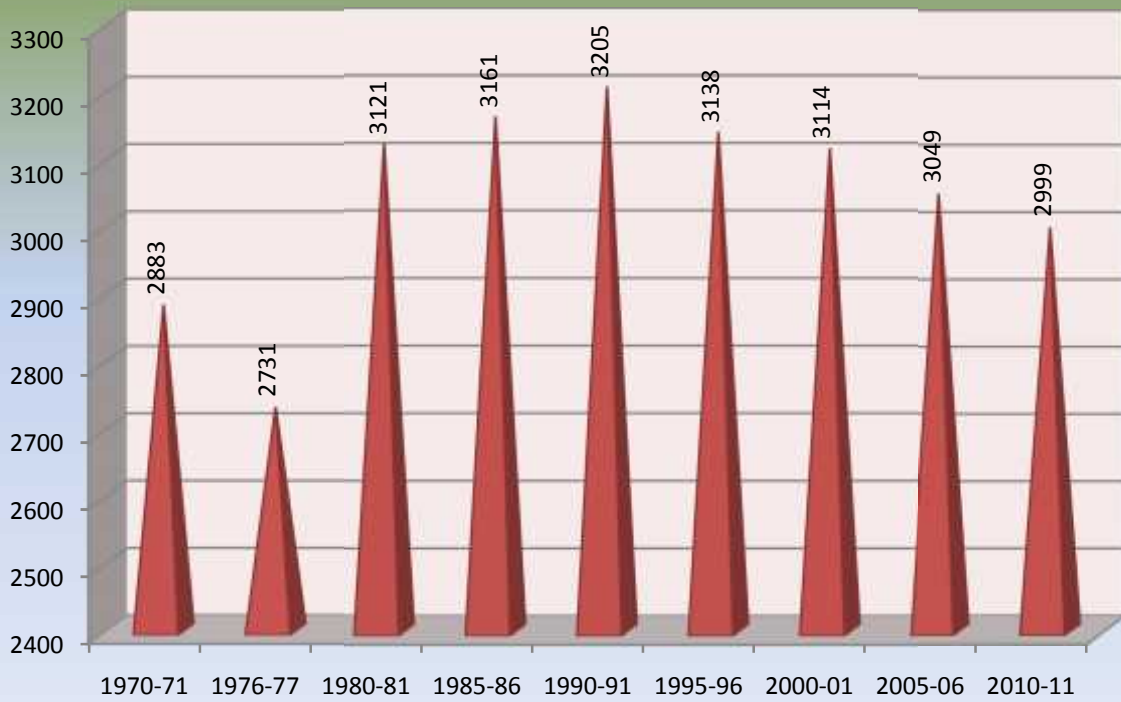

Number of Institutional holdings maintained an increasing trend since 2005 – 06 to 2010-11 Agriculture Census in 2000-01 the number of Institutional holdings was 2750 in 2005-06 it increased to 4533 and in 2010-11 it increased to 5048 which may be attributed to the practice of creation of small Tea Gardens by groups of unemployed youth in co-operation basis.
