**AREA, PRODUCTION, PRICE AND VALUE
OF
SOME MAJOR HORTICULTURE CROPS IN
ASSAM,
FROM
2003-04 TO 2012-13**

(The Report prepared under 13th Finance Commission Grant.)

**Directorate of Economics and Statistics, Assam
Government of Assam,
Guwahati-28**

FOREWORD

Systematic survey and collection of data on agriculture sector specially horticulture crops area along with the estimated production and values there on are felt highly essential for short term and long term planning need for the welfare of the state as well as the country.

The Agriculture Division of the Directorate of Economics and Statistics, Assam considering the importance of horticulture in Assam prepared the report on Area, Production, Price and Value of 16 numbers of horticulture crops for ten years from 2003-04 to 2012-13 and asses the contribution of these crops towards state domestic product in Assam.

The work has been taken up under the 13th Finance Commission Grant, 2013-14 for strengthening the data base on horticulture crops.

I hope this publication would be of immense help to the administrators, researcher and planners.

I appreciate the endeavour of the officers and staff of the division for bringing out the report in time.

Views and Suggestions are cordially solicited.

Introduction

Assam's economy since long is been mainly based on agriculture. 75 percent of the population is directly or indirectly dependent on agriculture which accommodates 53 percent of the total workforce of the state. The contribution of the agriculture sector to the state economy i.e. GSDP at current prices during 2012-13 as per provisional estimates was 19.3 percent. It is also contributes indirectly to the state economy as important sources of raw materials and demand for many industrial products particularly fertilizer, pesticides, agricultural implements and a variety of consumer goods based on agriculture.

The rapid growth of agriculture is essential not only for self reliance but also for meeting the food and nutritional security of the people to bring about equal distribution of income and wealth in the rural areas as well as to reduce poverty and improve the quality of living. Growth of agriculture has a maximum cascading impact on other sectors leading to the spread of benefits over the entire economy and the largest segment of population.

Horticulture crops occupy about 15 percent of the gross cultivated area of Assam. It is basically the science of cultivating gardens or orchards i.e. it refers to the process of cultivating fruits, vegetables, flowers and ornamental plants which in turn increases the area and productivity of farming lands, bringing technological aspect in agriculture, raising the farmers' income and their standard of living and provide source of employment opportunities.

The state of Assam is traditionally wealthy in respect of production of various horticultural crops due to its conducive agro climatic conditions. The state with diverse soil and weather conditions provide good scope to grow a large variety of fruits and vegetables and it is one of the richest reservoir's of genetic variability a number of crops like Citrus, Guava, Mango, Rice and Maize etc. and the world citrus belt encompasses Assam within it.

Considering the importance of horticulture in the North Eastern states the Department of Agriculture and Co-op. Ministry of Agriculture, Government of India introduced Technology Mission for Integrated Development of Horticulture (TMIDH) including Sikkim in 2001-02. Implementation of TMIDH scheme has brought some significant changes in respect of production and yields of horticulture crops in Assam which may be evident from the data analysis of 16 number of horticulture crops taken up for the study during the last ten years (2003-04 to 2012-2013).

The Directorate of Economics and Statistics Assam desires to collect, study and compile a report on State/ District wise Area, Production, Price and Value of some major horticulture crops in Assam from 2003-04 to 2012-2013 to assess the contribution of these 16 major horticulture crops towards Gross State Domestic Product in Assam which has not yet been carried out separately.

Considering the importance of the subject matter and availing the opportunities as provided by the 13th Finance Commission Grants, this publication is prepared with set of tables from 1.01 to 2.08 containing district wise area, production, price and value of 16

numbers of horticulture crops i.e. **1. Vegetables(8 numbers) 2. Fruits(8 numbers)** for continuous ten years from 2003-04 to 2012-13 where area and production are collected from the Directorate of Horticulture, Assam excepting six crops viz. Papaya, Sweet potato, Onion, Orange, Banana and Pineapple, where area and production are finally approved by the State Committee on Agriculture Statistics (SCAS). The prices are the Farm Harvest prices collected in the peak harvesting period from the different district for calculating the value of each crop.

FINDING OF THE STUDY

The data on Area, Production, Prices and Values of some horticulture crops which include 8 major vegetables i.e. Cabbage, Cauliflower, Okra, Tomato, Brinjal, Onion, Sweet potato and Papaya and 8 major fruits i.e. Banana, Mango, Orange, Guava, Jackfruit, litchi and Lemon have been collected district wise from 2003-04 to 2012-13 (ten Years) and presented in Tables: 1.01 to 1.08 and 2.01 to 2.08.

An analysis has been prepared crop wise in nutshell depicting the position of the crops during the last ten (10) years and placed along with the tables here under.

VEGETABLES:

Among the eight crops under vegetables the coverage of area under cultivation of cabbage has been found the highest followed by cauliflower, tomato and brinjal. The area of Cabbage has been increased from 24270 hectare during 2003-04 to 31568 hectare in 2012-13. Similarly the area of Cauliflower has increased from 16630 hectare to 21709 hectare,

Tomato from 13970 hectare to 17293 hectare,

Brinjal from 13000 hectare to 16809 hectare,

Okra from 9530 hectare to 11520 hectare and

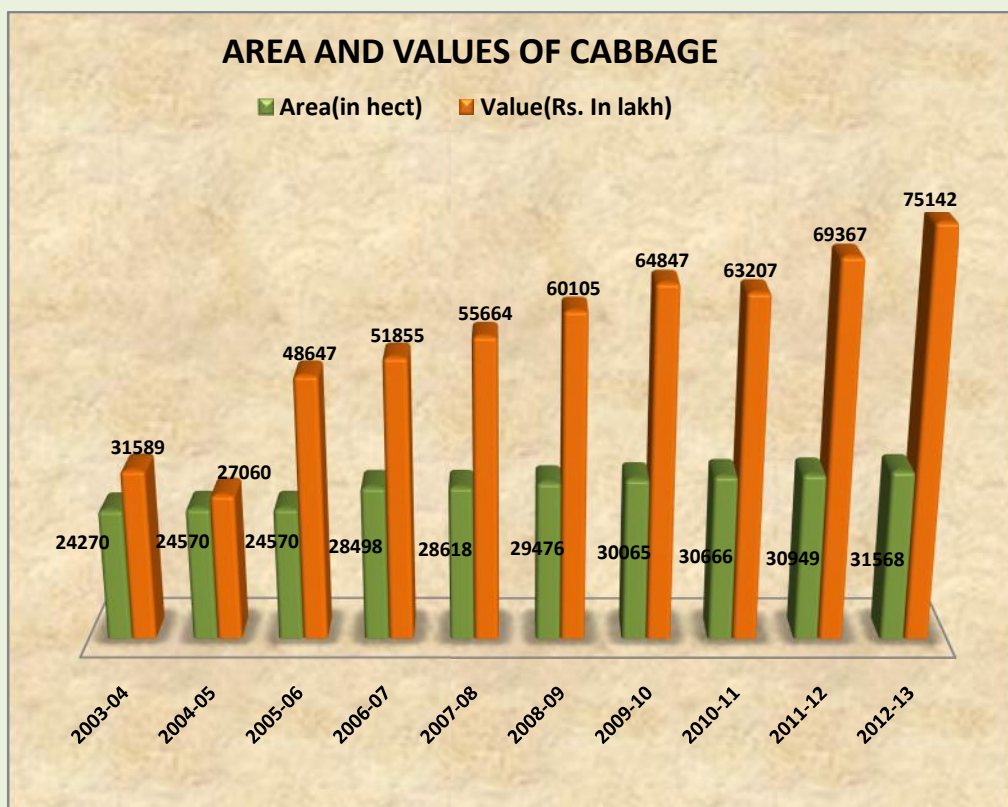

Papaya from 13000 hectare to 16809 hectare respectively during the reference years, while the areas of Onion and Sweet potato have been

found decreased from 7332 hectare to 7099 hectare and from 8194 hectare to 6277 hectare respectively during the same periods.

During the years from 2003-04 to 2012-13 the production of vegetable crop has increased substantially and the highest production is found in the crop Cabbage followed by Tomato, Cauliflower, Brinjal and Okra.

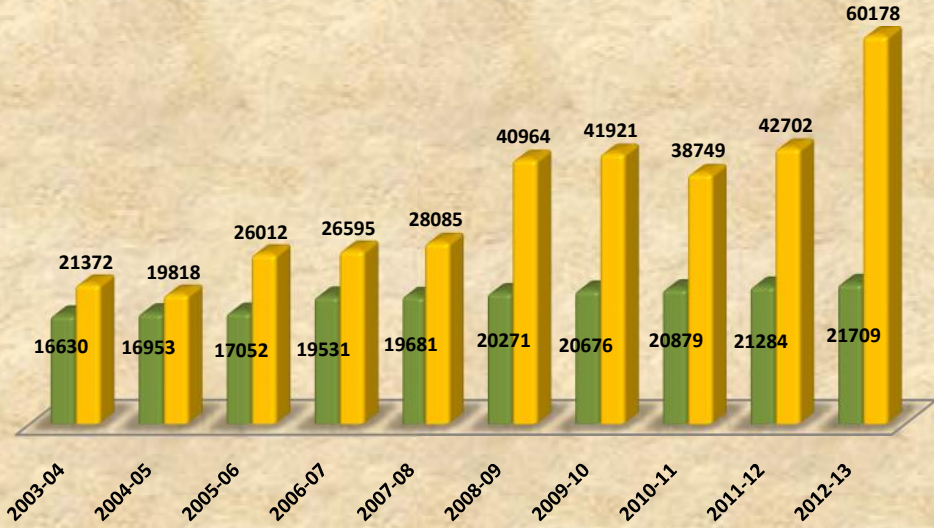

The highest values are found in case of Cabbage followed by Tomato, Cauliflower, Brinjal, Okra, Papaya, Onion and Sweet potato during the reporting years.

The Graphs showing the Area covered and the Values against each Vegetable Crop from 2003-04 to 2012-13 are presented.

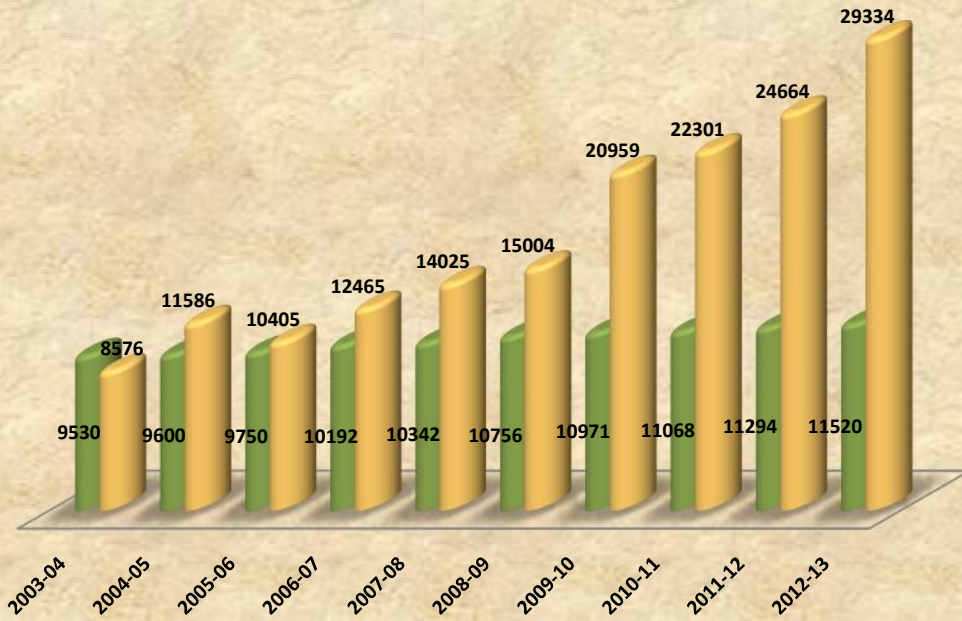

AREA AND VALUES OF CAULIFLOWER

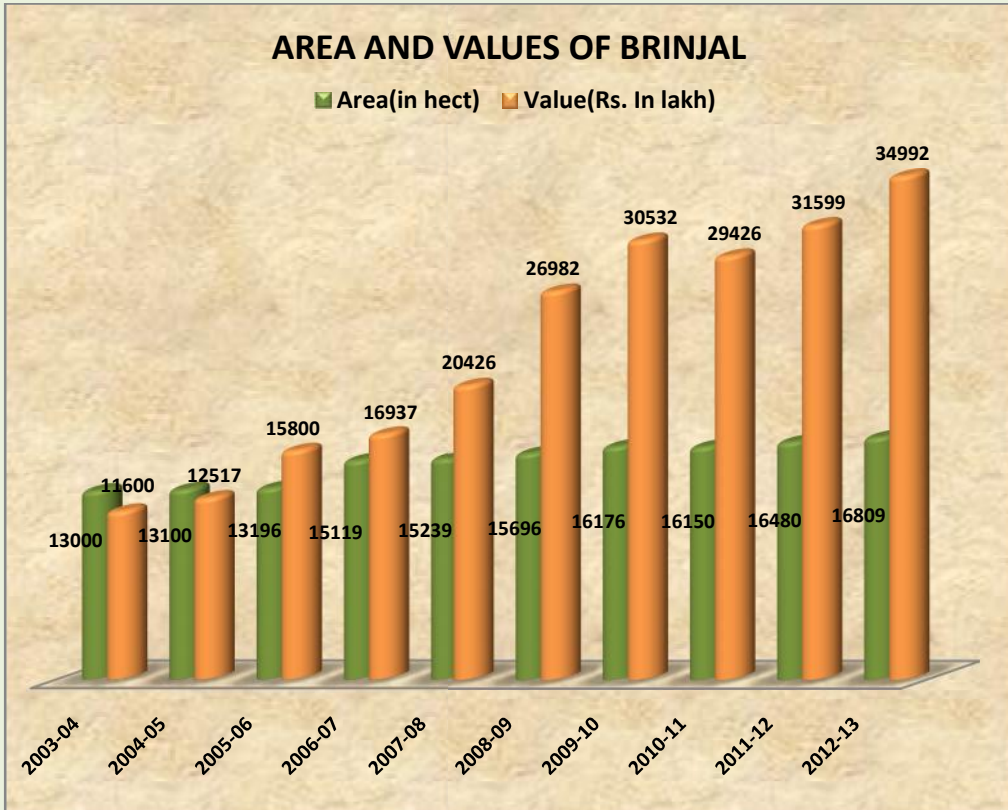

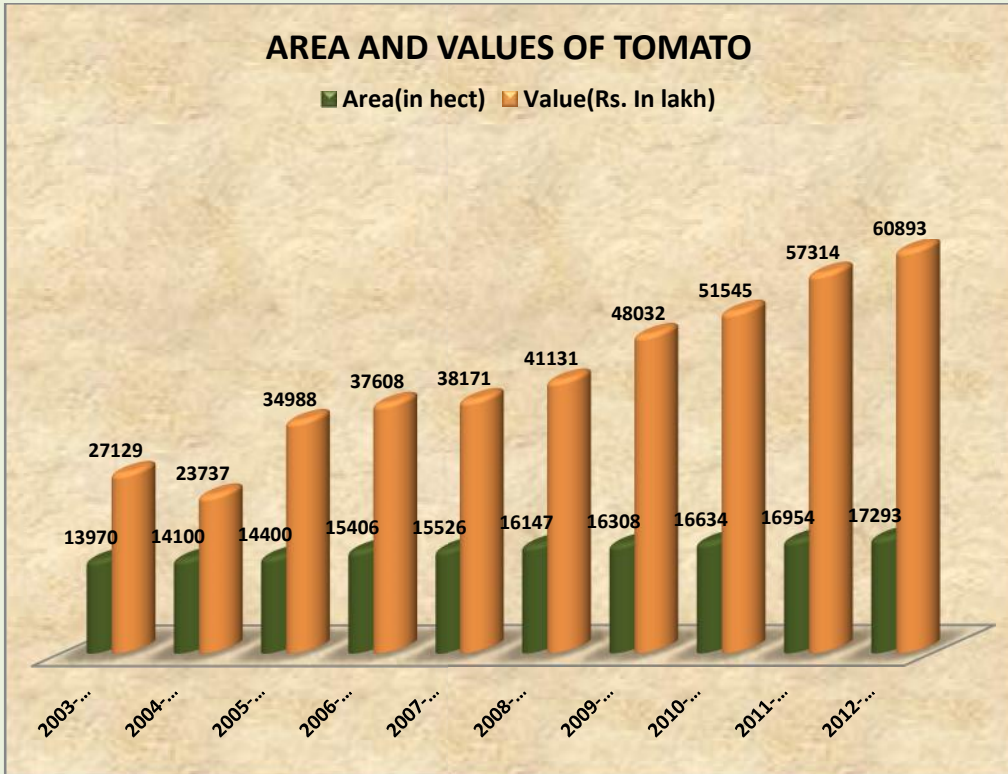

■ Area(in hect) ■ Value(Rs. In lakh)

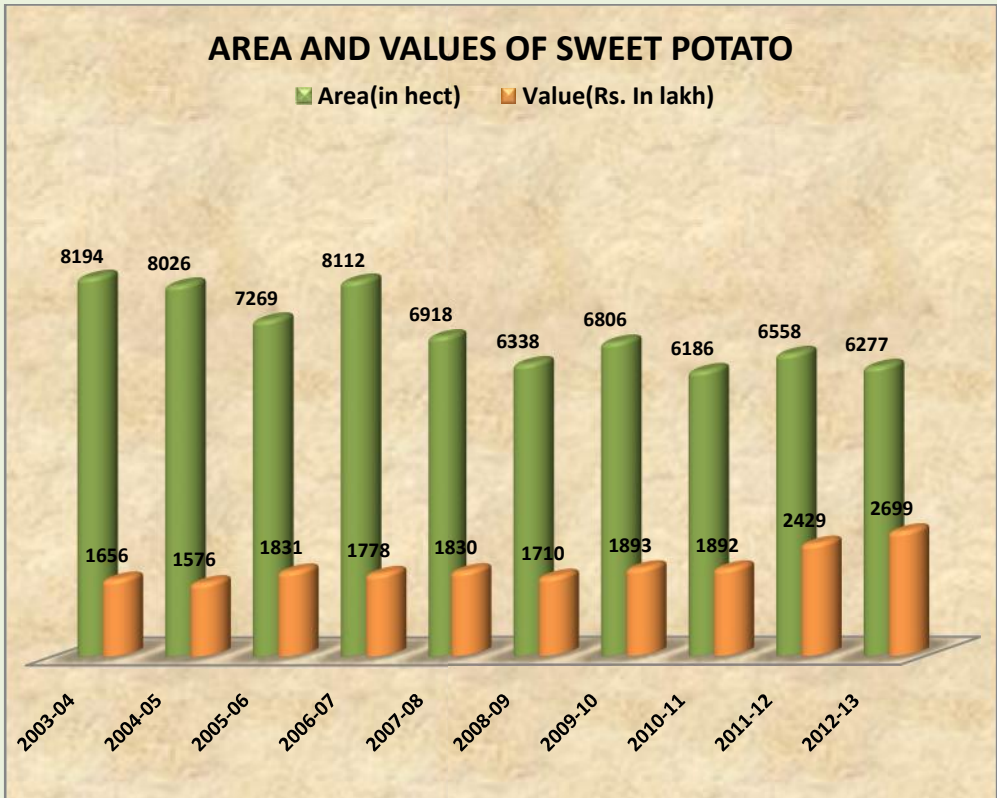

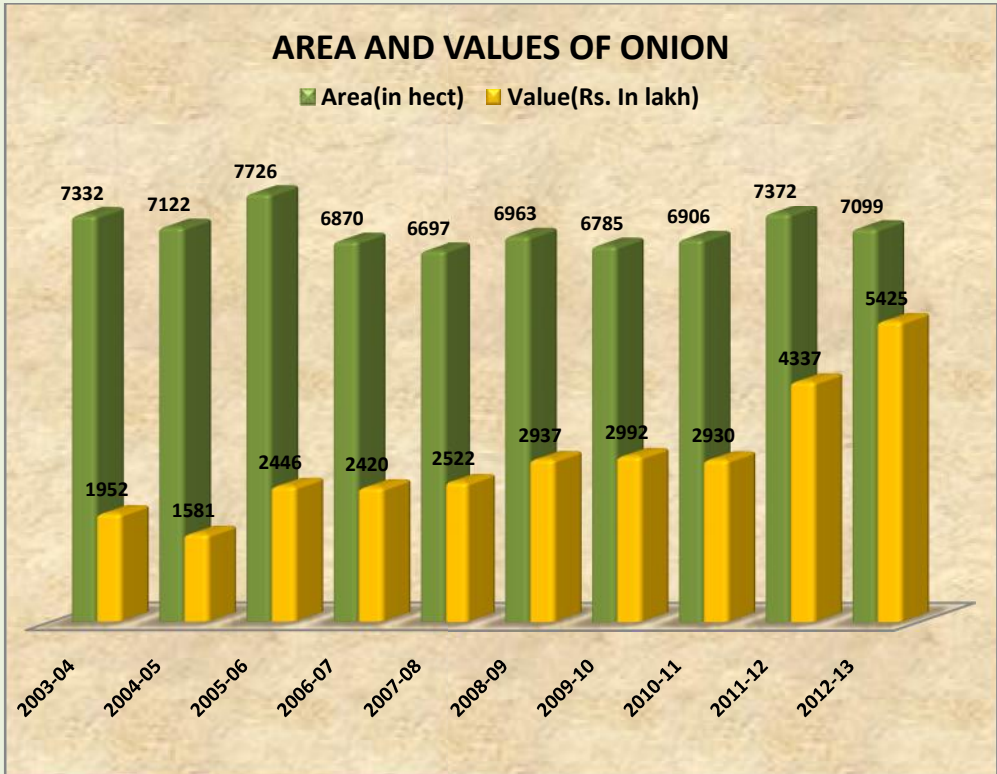

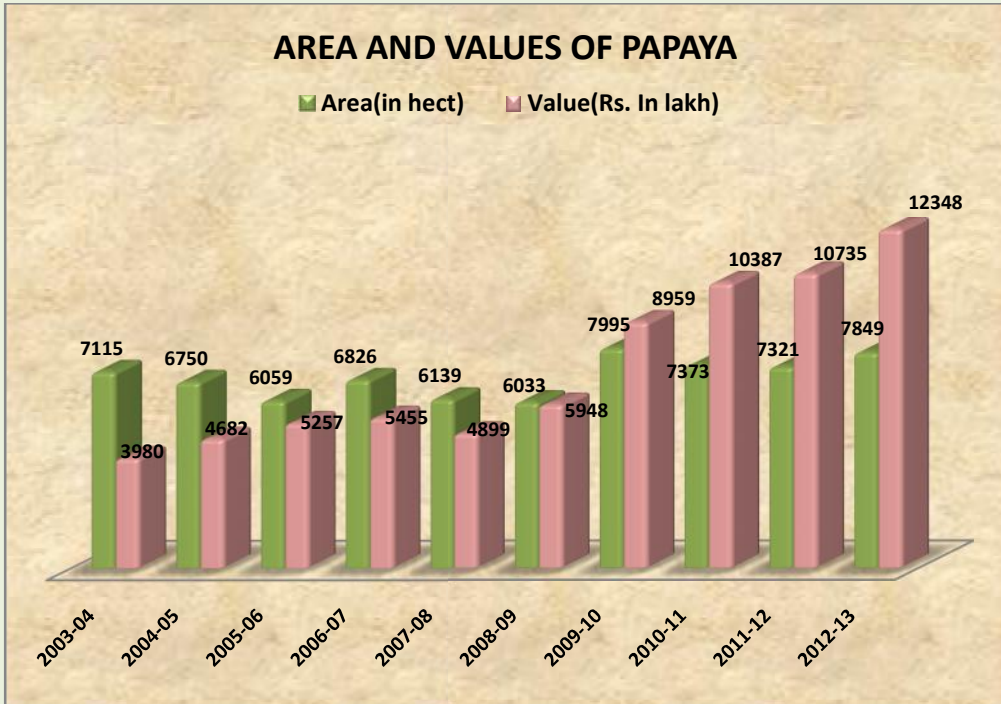

AREA AND VALUES OF OKRA

■ Area(in hect) ■ Value(Rs. In lakh)

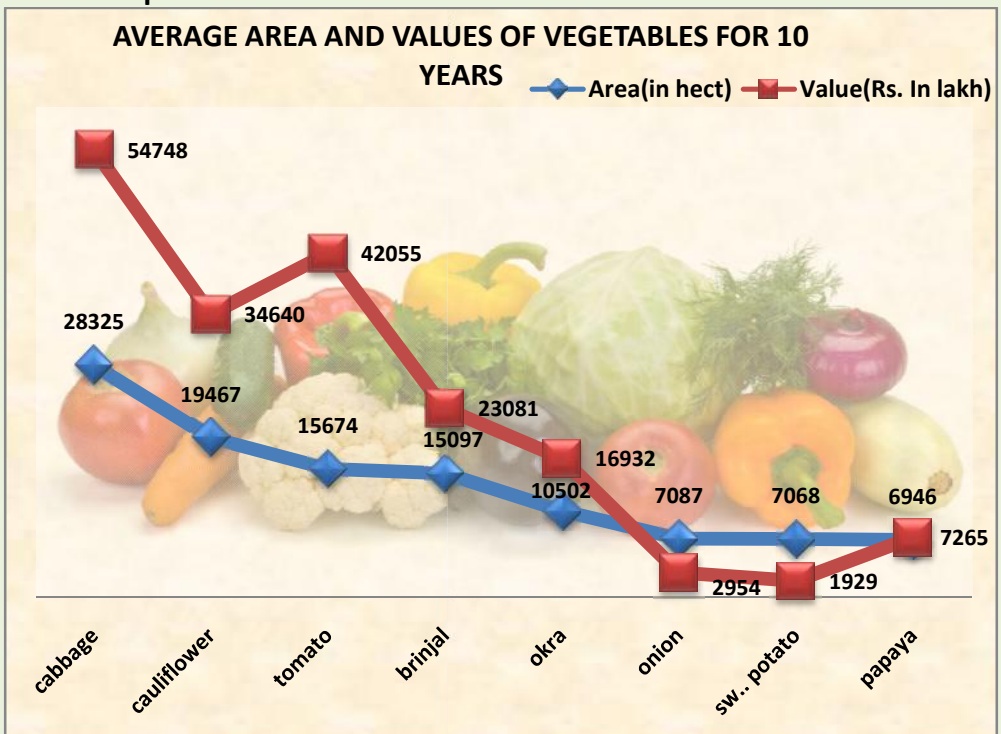

The Graph showing the Average Area and the Average Values against each vegetable for 10 years during the period from 2003-04 to 2012-13 is presented.

FRUITS:

In respect of fruits it is observed that during 2003-04, the highest area was covered by Banana followed by Jackfruits, Pineapple, Lemon and Orange while Litchi, Guava and Mango covered less area. During 2012-13 the areas of fruits has substantially increased in respect of Banana followed by Jackfruit, Orange, Pineapple and Lemon where as Litchi, Mango and Guava still covered the lowest areas.

The area of Banana has been increased from 42982 hectare during 2003-04 to 47063 hectare in 2012-13. Similarly the area of Jackfruit has increased from 17908 hectare to 22233 hectare,

Orange from 7386 hectare to 16449 hectare,

Lemon from 8818 hectare to 10346 hectare,

Litchi from 4155 hectare to 5328 hectare,

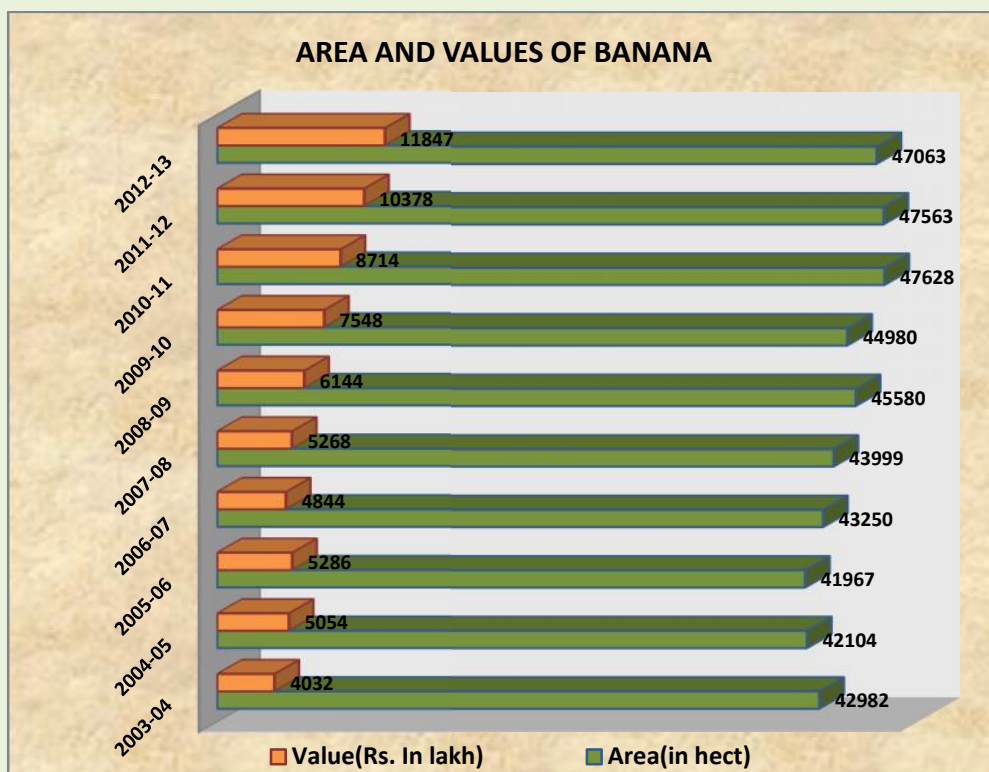

Guava from 3898 hectare to 4575 hectare and

Mango from 3726 hectare to 4786 hectare respectively during the reference years. It is seen that the area of Pineapple remained stable for these years i.e. 14245 hectare during 2003-04 and 14192 hectare in 2012-13.

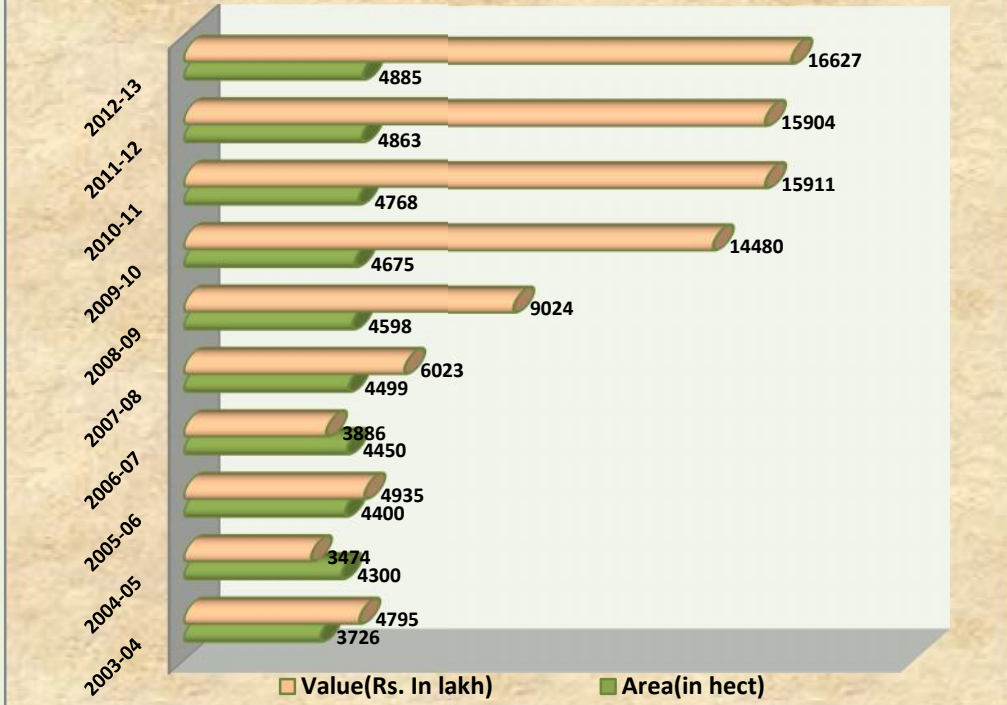

The highest production is seen in case of Banana followed by Pineapple, Jackfruit, Orange and Lemon during the reporting periods. The productions of Guava, Litchi and Mango have also been increased moderately.

The values of the fruits increased substantially during the period from 2003-04 to 2012-13 and the highest value accrued by Pineapple followed by Jackfruit, Guava, Mango Litchi, Banana, Orange and Lemon respectively.

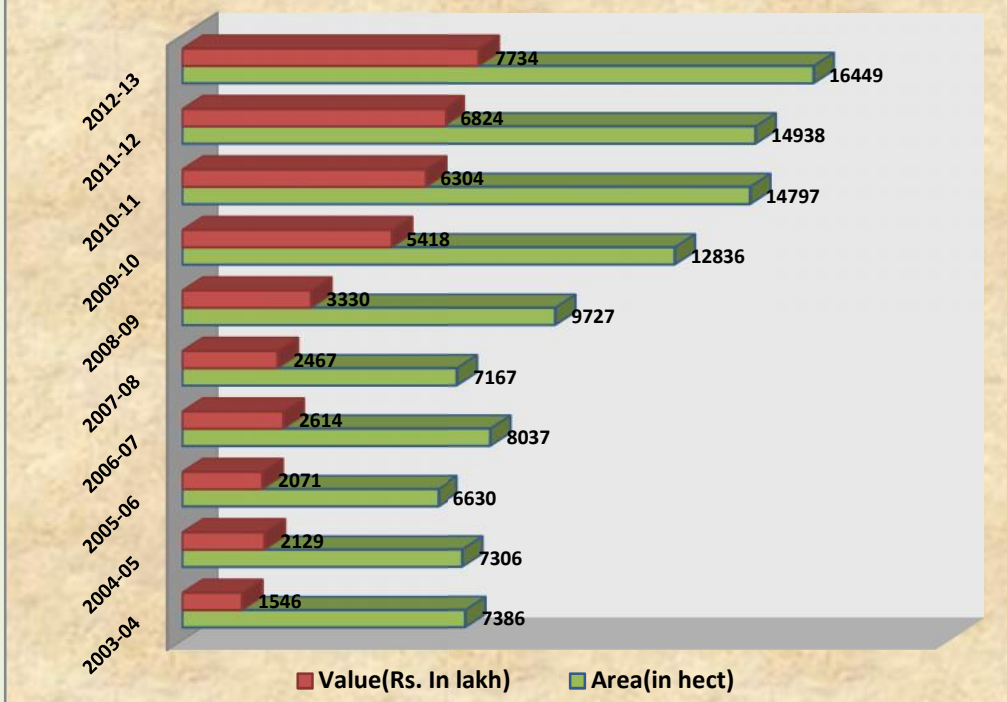

The Graphs showing the Area covered and the Values against each Fruit Crop for ten years from 2003-04 to 2012-13 are presented.

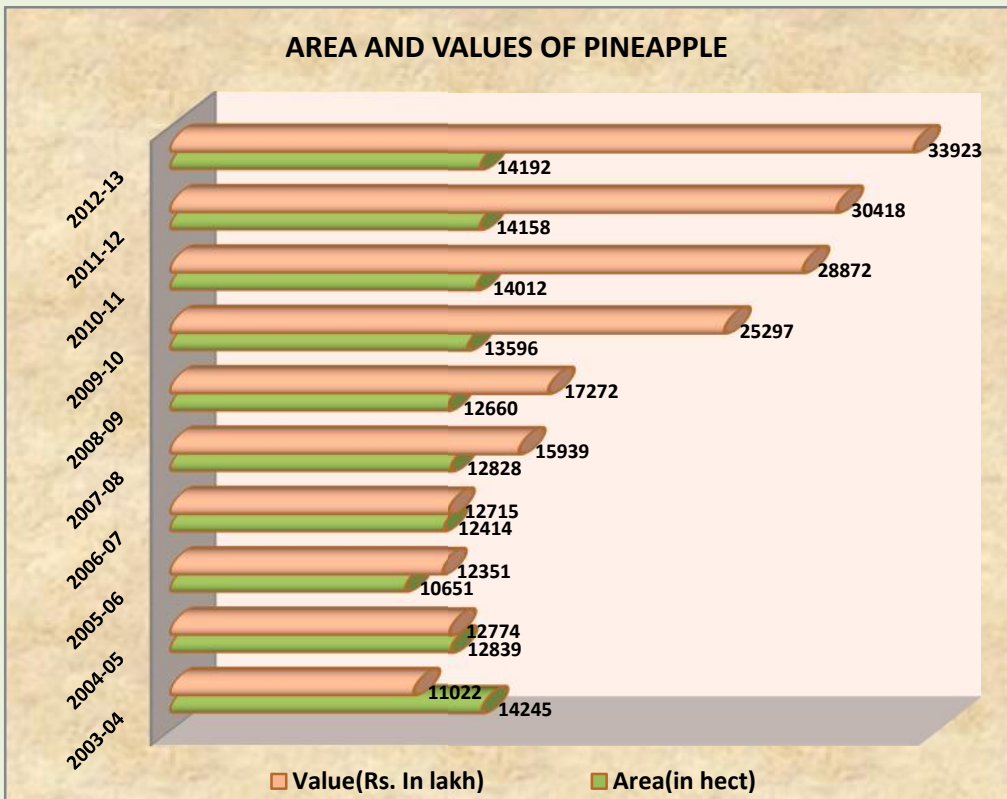

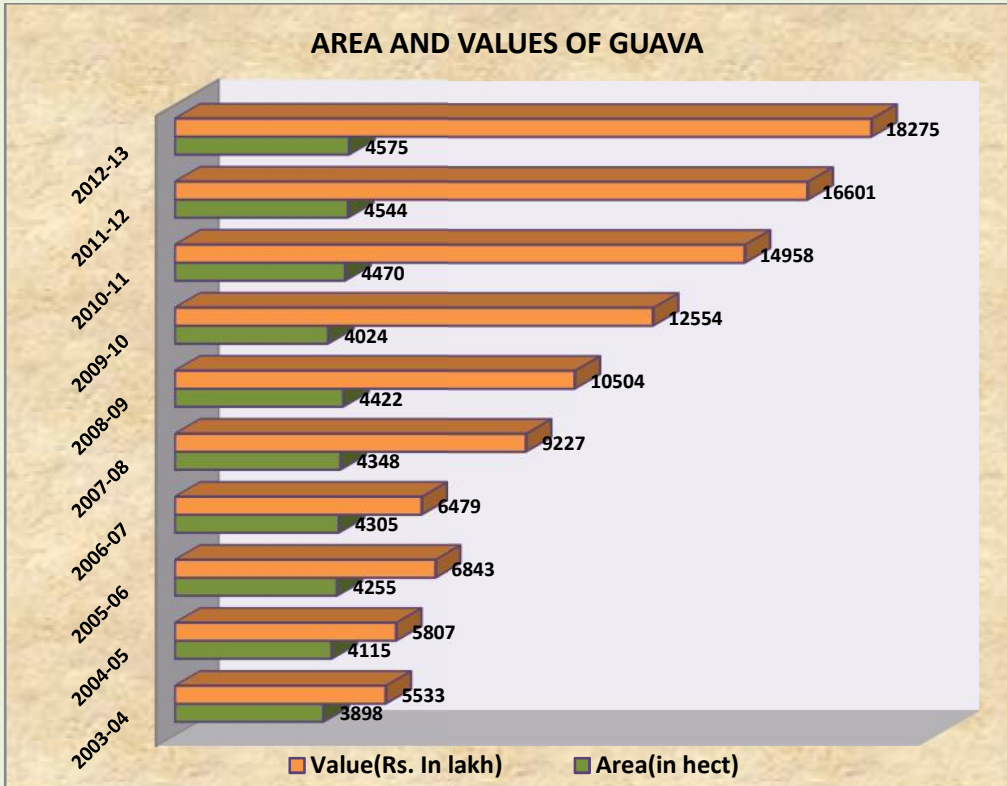

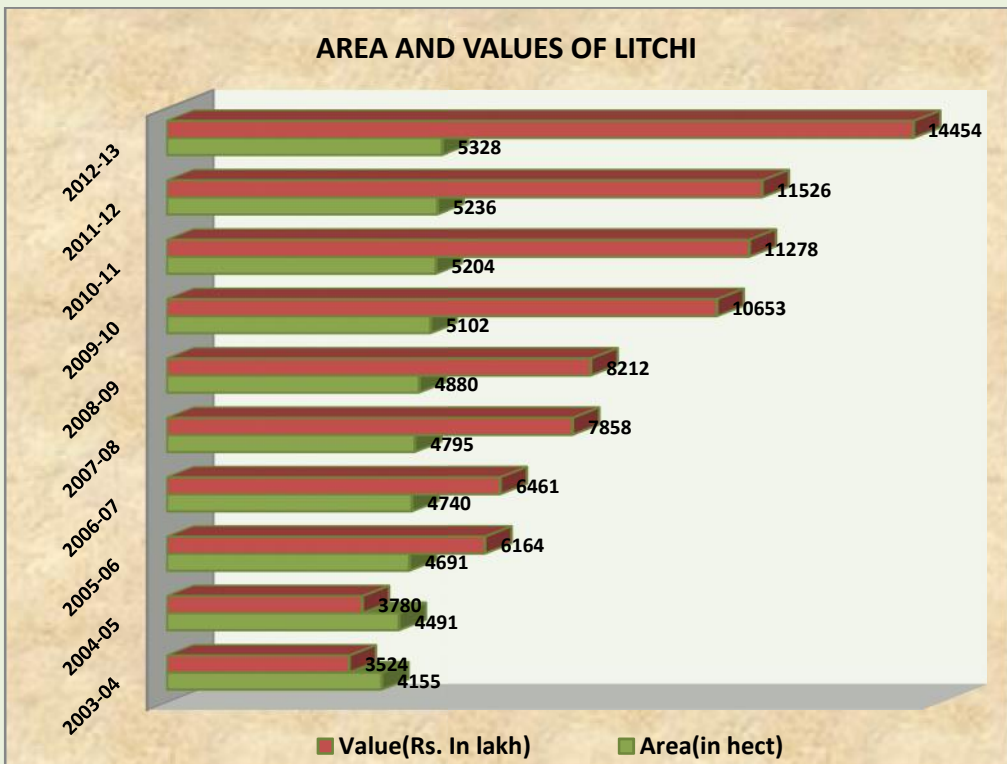

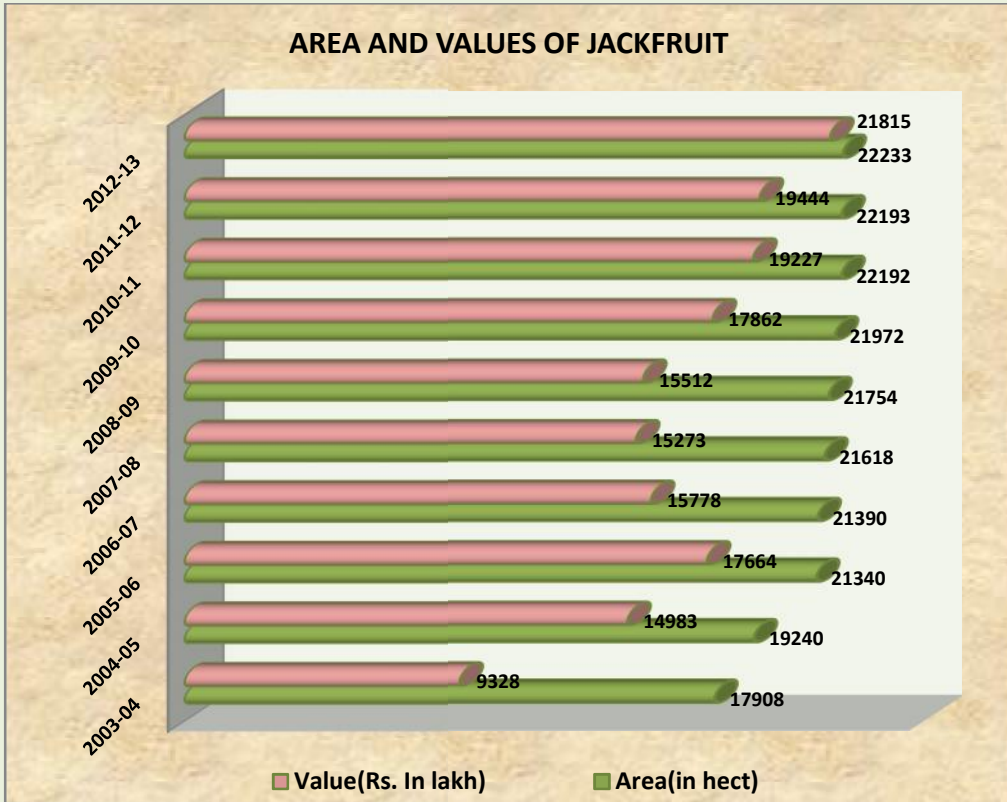

AREA AND VALUES OF MANGO

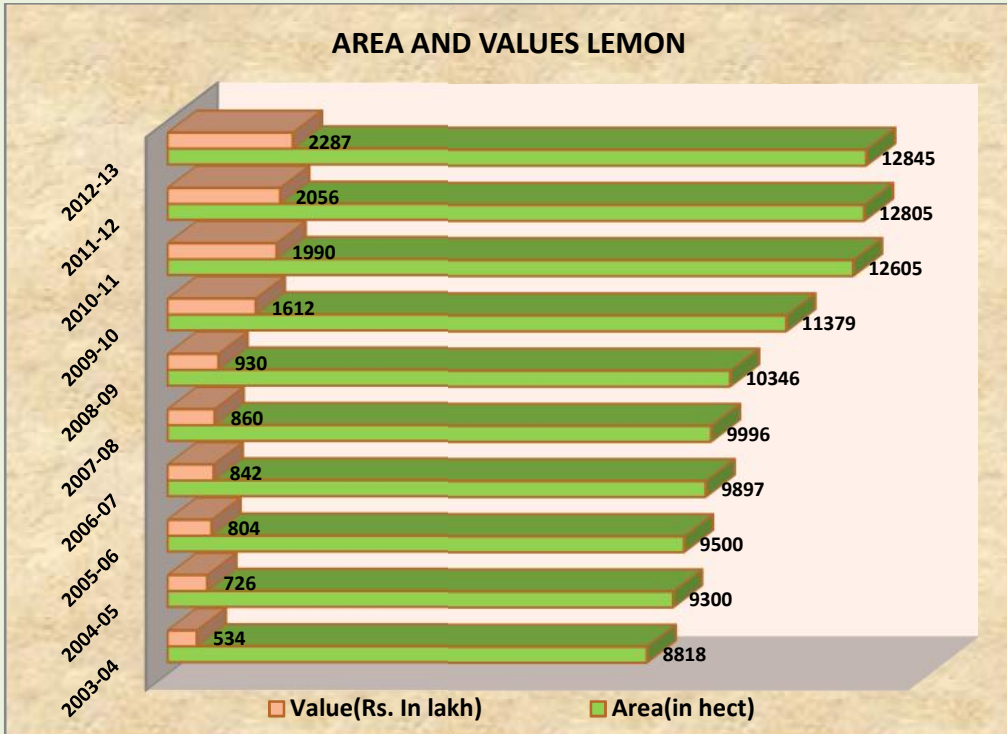

AREA AND VALUES OF ORANGE

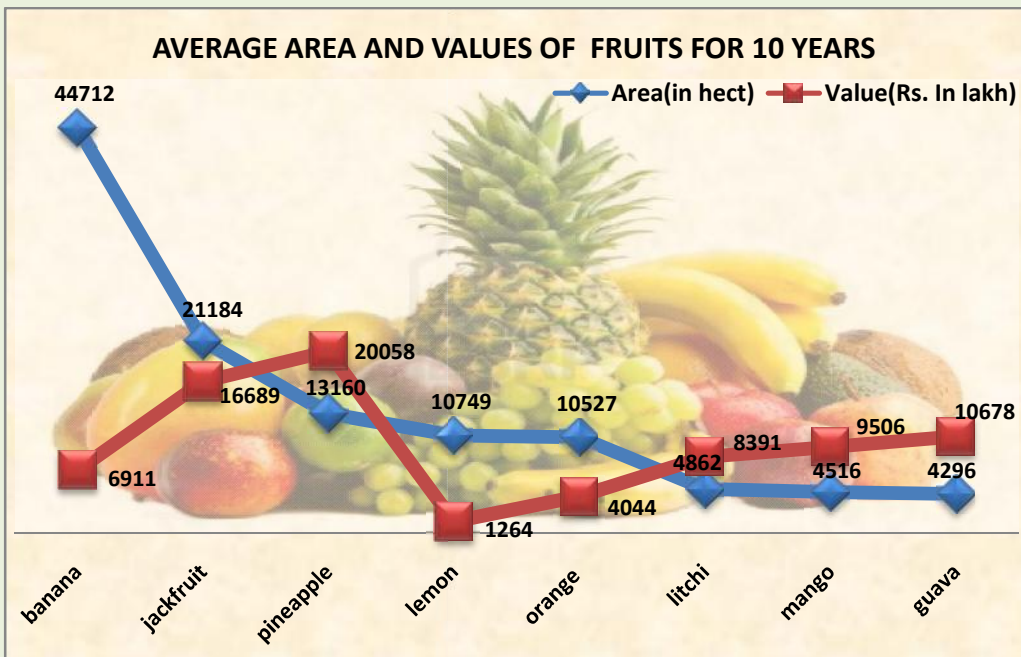

The Graph showing the Average Area and the Average Values against each vegetable for 10 years during the period from 2003-04 to 2012-13 is presented.

The graphical presentation on area and value of 16 horticulture crops of vegetables and fruits have taken up for quick review from 2003-04 to 2012-13, it reveals that Cabbage, Cauliflower, Tomato, Brinjal, Banana, Jackfruit, Orange and Pineapple have immense potential for the state.

In respect of district wise area and production of vegetables, it is revealed that the area under cultivation of Cabbage is done extensively in Dhubri, Kokrajhar, Nalbari, Barpeta, Nagaon Jorhat, Golaghat, Lakhimpur, Tinsukia and Cachar districts where production have increased substantially.

Cauliflower has increased to almost double in the districts Dhubri, Kamrup, Barpeta Nagaon and Golaghat along with production which was due to extensive cultivation during the last ten years.

During the reporting ten years extensive cultivation of Tomato was carried out in Dhubri, Nagaon and Cachar districts with high production.

Brinjal cultivation is also seen in all the districts with high production.

In respect of fruits Banana covers the highest area along with production during 2003-04 to 2012-13. The area under Banana cultivation markedly increased in Sonitpur, Goalpara, Kamrup, Lakhimpur, Jorhat, Golaghat and Cachar district along with high production.

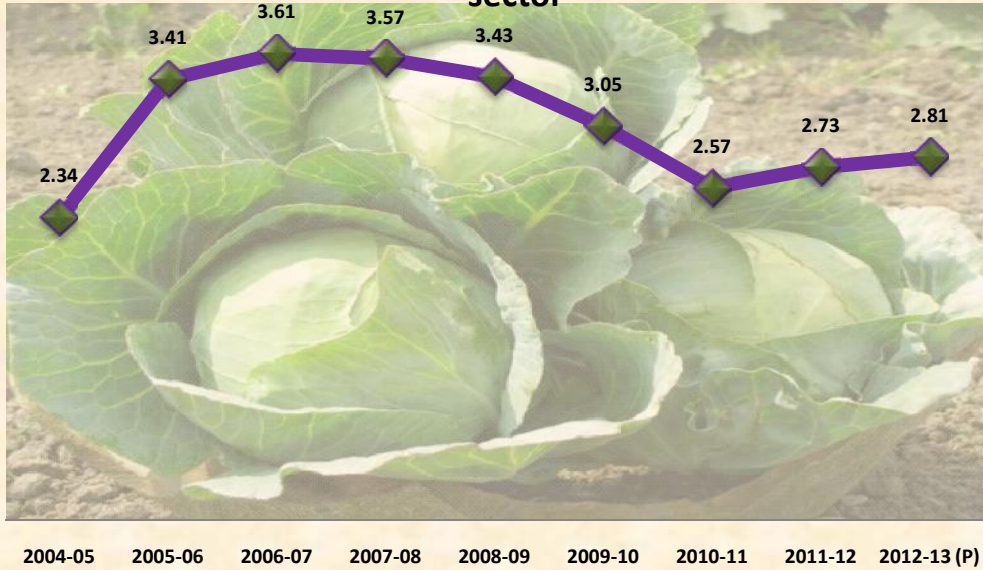

Orange cultivation has been carried out extensively in the districts Chirang, Kamrup, Kamrupmetro, Udalguri, and Tinsukia, Karbia Anglong and Dima Hasao and production also increased.

Pineapple cultivation plays an important role in the districts of Cachar, Hailakandi, Kamrup, Sonitpur, Udalguri, Karbi Anglong and Dima Hasao where the produces fetches good value and extensive cultivation of HYV crop introduces during the reporting period.

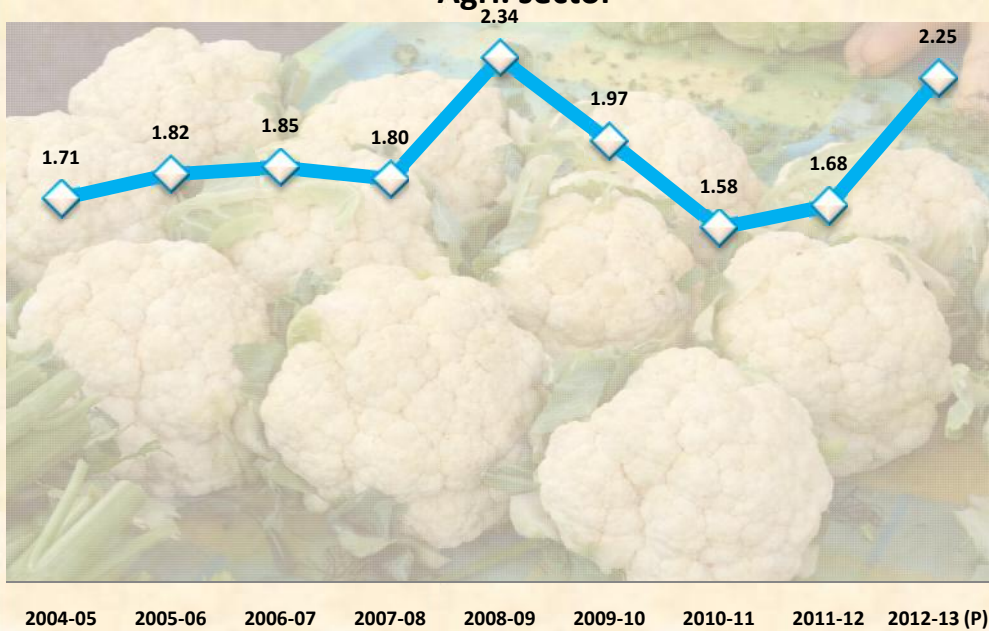

Jackfruit is also an important crop for the state which covers 2nd highest area among fruits and widely cultivated in the districts Goalpara, Kamrup, Darrang, Lakhimpur and Cachar and able to get good prices with increased production during the period.

Graphical presentation of 16 horticulture crops showing **the individual contribution towards agriculture sector (in percentage) of the Gross State Domestic Products (GSDP at current prices base 2004-05) from 2004-05 to 2012-13** presented here under :

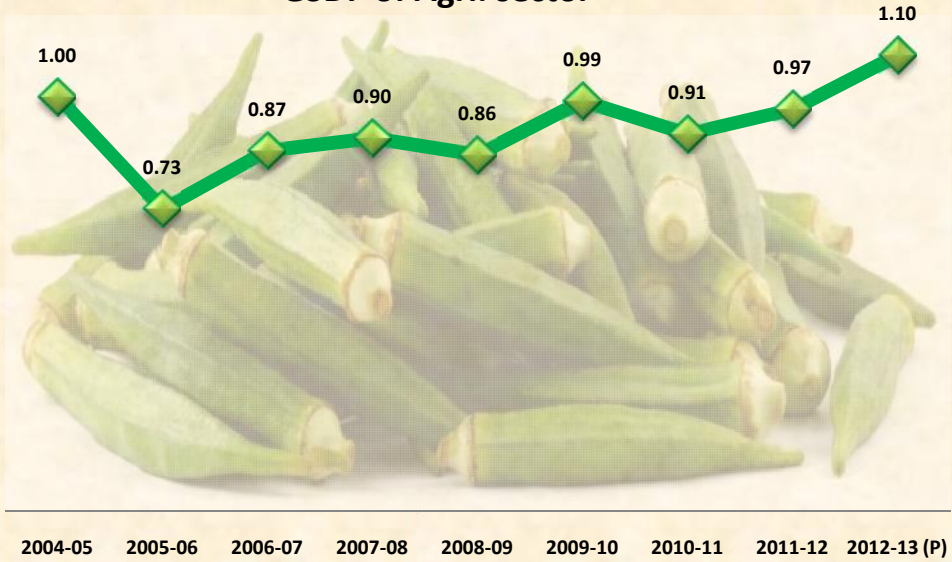

% Contribution of CABBAGE towards GSDP of Agri . sector
