

AREA, AVERAGE YIELD AND PRODUCTION

OF

NINE PRINCIPAL CROPS IN ASSAM,

SINCE

1951-52 TO 2013-14

(Prepared the Report under 13th Finance Commission Grant.)

Directorate of Economics and Statistics, Assam
Government of Assam,
Guwahati-28

FOREWORD

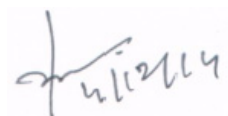

Collection of systematic data on Agricultural Sector in various crops grown in the country has been felt indispensable by the national planners at the beginning of the 1st Five Year Plan started during 1950-51. About 75 percent of the country's population still depends on agriculture as their occupation. Timely collection of various crop grown areas along with the estimated production of principal food crops and non food crops are highly felt needed for short term and long term planning for the well being of the people of the country.

In Assam, collection of statistics on agricultural sector has been started since 1950-51 to 1973-74 on irregular basis in respect of nine crops namely, Winter Paddy, Autumn Paddy, Potato, Jute, Sugarcane, Rape & Mustard, Black Gram, Wheat and Summer Paddy. From the year 1974-75, the Crop Estimation Survey has been conducted in the State by this Directorate as State Agricultural Statistics Authority (SASA) on regular basis in respect of above mentioned nine crops to estimate the Average Yield and Production as per direction of Ministry of Agriculture, Govt of India. Estimates of area, average yield and production are prepared from time to time at state level on an annual basis for use of the national planning as a whole.

As the data on various Crop Estimation Survey has been made available to the State government as well as Central government on due time since 1951 to till date but the information are not readily available in handy manner as soon as required. In order to make available the final data on agriculture statistics there is always a demand for time series publication which can be used by the planners and the researchers for the needful of the state economy.

So, an attempt has been made to publish the data in a Report form to make available the important results as a time series data of the state in respect of the nine principal crops since 1951-52 to 2013-14. The work has been taken up under the 13th Finance Commission Grant, 2013-14 provided by the Government of India.

Views and Suggestions are cordially solicited.

1. AREA

Tables-	Page No.
1.01 Area under Autumn Paddy since 1951-52 to 2013-14	1-12
1.02 Area under Winter Paddy since 1951-52 to 2013-14	13-24
1.03 Area under Summer Paddy since 1951-52 to 2013-14	25-36
1.04 Area under Total Paddy since 1951-52 to 2013-14	37-48
1.05 Area under Wheat since 1951-52 to 2013-14	49-60
1.06 Area under Tur(Arhar) since 1951-52 to 2013-14	61-72
1.07 Area under Rape & Mustard since 1951-52 to 2013-14	73-84
1.08 Area under Potato since 1951-52 to 2013-14	75-96
1.09 Area under Sugar cane since 1951-52 to 2013-14	97-108
1.10 Area under Jute since 1951-52 to 2013-14	109-120

2. AVERAGE YIELD

Tables-	Page No.
2.01 Av. Yield of Autumn Rice since 1951-52 to 2013-14	121-132
2.02 Av. Yield of Winter Rice since 1951-52 to 2013-14	133-144
2.03 Av. Yield of Summer Rice since 1951-52 to 2013-14	145-156
2.04 Av. Yield of Total Rice since 1951-52 to 2013-14	157-168
2.05 Av. Yield of Wheat since 1951-52 to 2013-14	169-180
2.06 Av. Yield of Tur(Arhar) since 1951-52 to 2013-14	181-192
2.07 Av. Yield of Rape & Mustard since 1951-52 to 2013-14	193-204
2.08 Av. Yield of Potato since 1951-52 to 2013-14	205-216
2.09 Av. Yield of Sugar cane since 1951-52 to 2013-14	217-228
2.10 Av. Yield of Jute since 1951-52 to 2013-14	229-240

3. PRODUCTION

Tables-	Page No.
3.01 Production of Autumn Rice since 1951-52 to 2013-14	241-252
3.02 Production of Winter Rice since 1951-52 to 2013-14	253-264
3.03 Production of Summer Rice since 1951-52 to 2013-14	265-276
3.04 Production of Total Rice since 1951-52 to 2013-14	277-288
3.05 Production of Wheat since 1951-52 to 2013-14	289-300
3.06 Production of Tur (Arhar) since 1951-52 to 2013-14	301-312
3.07 Production of Rape & Mustard since 1951-52 to 2013-14	313-324
3.08 Production of Potato since 1951-52 to 2013-14	325-336
3.09 Production of Sugar cane since 1951-52 to 2013-14	337-348
3.10 Production of Jute since 1951-52 to 2013-14	349-360

INTRODUCTION

The estimation of Area, Production and Average Yield rates of various major food and non-food crops was felt necessary in the country after its independence in year 1947. The Crop Estimation Survey was introduced in Assam covering only with the crop Winter Paddy in 1947-48. During the period from 1947-48 to 1950-51 the Crop Estimation Survey in Assam was conducted jointly by the Department of Agriculture, Assam and the Department of Land Records, Assam in respect of the crop Winter Paddy with the technical guidance provided by the Directorate of Economics and Statistics, Assam. From 1950-51 the Directorate of Economics and Statistics, Assam has been entrusted to conduct the Crop Estimation Survey by the State Government and since then along with the crop Winter Paddy the Crop Estimation Survey have been conducted in respect of Autumn Paddy and Potato from 1950-51, Jute from 1951-52, Sugarcane and Rape & Mustard from 1957-58, Black Gram from 1962-63, Wheat from 1973-74 and Summer Paddy from 1974-75. From 1974-75 onwards Crop Estimation Survey has been conducted regularly for all the above mentioned nine food and non-food crops in the State by following the technical guidance provided by the Government of India from time to time.

The Estimated Forecast area of Different crops cultivated in the state are finalised by the State Committee on Agricultural Statistics (SCAS) in the state, chaired by the Revenue Secretary with the Director of Economics and Statistics as Member Secretary and the Director of Agriculture, Horticulture and Supply, Forest, Irrigation Department as members of the committee. In this connection there are two forecast committees at level of Block/Circle and District/ Sub-division level which are entrusted to finalise the Agricultural data on major crops grown in Assam. The average yield of nine food and non-food crops are arrived at through Crop Estimation Survey (CES) by conducting Crop Cutting Experiments throughout the state from the selected plots by the Field Staff of the Directorate. The Plot yields are converted to average yield in Kg./Hectare and then the production of different crops at Circle / Sub-division / District and State level are estimated which are also approved by the SCAS from time to time.

Winter Paddy is the main food crop of the state. The area under Winter Paddy has been increasing from 1221 thousand hectares in 1951-52 to 1881 thousand hectares in 2013-14. The areas found slightly declined during 1954-55 and 2005-06 and 2006-07 due to

flood and abnormal weather conditions in those years. The area of Autumn Paddy has been showing an increasing trend from 324 thousand hectares in 1951-52 to 646 thousand hectares during 1994-95 with a slight decline of 560 thousand hectares during 1979-80 which was due to extensive cultivation of Jute and wheat in the state. During the last two decades starting from 1995-96 upto 2013-14 the area under Autumn Paddy has been found declining from 625 thousand hectares to 323 thousand hectares which was mainly due to shifting to Summer Paddy cultivation in the same plots of the area. The area of Summer Paddy which was only 3 thousand hectares during 1951-52 have gradually been increased to 132 thousand hectares during 1994-95 and continued to remain increase to 399 thousand hectares during 2013-14 which was due to its short time span from transplantation to harvesting before the flood season and also the cultivators preferred it for its higher yield rate than Autumn Paddy.

The area coverage under Wheat was only 1879 hectares during 1951-52 which was gradually increased during the last three decades and reached its peak with 149651 hectares during 1984-85 which was due to extensive cultivation taken up by the farmers with the support from the State Govt. From 1985-86 the area has been declined to 31294 hectares during 2013-14 which was mainly due to non-conducive climatic condition in the state for the crop.

The area under Rape & Mustard has also been increasing gradually from 118 thousand hectares during 1951-52 to 320 thousand hectares during 1984-85 and then again showing a downward trend during the last three decades and reached at 297 thousand hectares during 2013-14.

The area under Potato was 18099 hectares in 1951-52 which has increased gradually and reached at 97956 hectares during 2013-14.

The area under the crop sugarcane was 23600 hectare during 1951-52 which has been found gradually increase to 52979 hectare during 1984-85. From 1988-85 the area has been declining to 23426 hectare during 2005-06. The area shows an increasing trend from last two decades and reached at 29083 hectares in 2013-14.

Coverage of area under Jute during 1951-52 was 123377 hectares which has since been increased to 130976 hectare during 1964-65 and then gradually decreased and arrived at 69822 hectares during 2013-14.

The Decadal Variation of Area and Production of the nine crops have been shown below in tabular form.

Decadal variation of Area from 1951-52 to 2013-14

Year Name of Crop	1951-52	1961-62	1971-72	1981-82	1991-92	2001-02	2011-12	2013-14
Autumn Paddy	323652	430043	524304	590000	638952	495698	276486	223332
% Decadal Variation		32.87%	21.92%	12.53%	8.30%	-22.42%	-44.22%	-19.22%
Winter Paddy	1220921	1312406	1404684	1630200	1802896	1714736	1875601	1880737
% Decadal Variation		7.49%	7.03%	16.05%	10.59%	-4.89%	9.38%	0.27%
Summer Paddy	3004	13495	31543	34895	128468	326000	393620	399132
% Decadal Variation		349.23%	133.74%	10.63%	268.16%	153.76%	20.74%	1.40%

Tur (Arhar)	1124	1845	4352	4612	4505	5125	4467	5642
% Decadal Variation		64.15%	135.88%	5.97%	-2.32%	13.76%	-12.84%	26.30%
Rape & Mustard	50869	40488	68733	102000	177672	137056	138647	168977
% Decadal Variation		-20.41%	69.76%	48.40%	74.19%	-22.86%	1.16%	21.88%
Potato	88369	96026	143036	273865	473250	620571	682597	700144
% Decadal Variation		8.66%	48.96%	91.47%	72.80%	31.13%	9.99%	2.57%
Sugarcane	65914	115951	116379	200308	1346930	1011398	1052514	1075171
% Decadal Variation		75.91%	0.37%	72.12%	572.43%	-24.91%	4.07%	2.15%
Jute	743266	1049556	1063698	924069	867351	674603	608023	717261
% Decadal Variation		41.21%	1.35%	-13.13%	-6.14%	-22.22%	-9.87%	17.97%

From the above illustration the variation of different decades can be depicted as follows.

1. Autumn Paddy: - From the Table it has been observed that in 1951-52, the production of this crop was 211134 tonnes which increased upto 304958 tonnes in the year 1961-62 with an increase of 44.44 % in these ten years. In subsequent years also, an increasing trend of production was of this crop was observed. In 1991-92 highest production was observed i.e. 30.80% variations was observed between 1981-82 and 1991-92. From 2001-02 to 2013-14 gradual decrease of production of Autumn Paddy is observed. It was only because of its low yield rate in comparison to its labour of cultivation.

2. Winter Paddy: - In 1951-52 the production of winter paddy was 1184348 tonnes. In 1961-62 there was an increasing trend of 12.57%. This increasing trend is still continuing. The production rate was 14.45% more in 1971-72 than 1961-62. It was 19.32% in 1981-82 and 36.58% more in 1991-92 which was found to be highest. In the subsequent years i.e. in 2001-02 the production rate went down to 9.12%. But again the production rate went high in 2011-12 to 21.53% then in 2013-14 to 12.48% more. Though there was a slight variation in the production rate in between 2001-02 and 2013-14, the overall production rate is quite satisfactory and not in continuous decreasing trend. From this observation it may be inferred that Winter Paddy production in Assam is quite satisfactory.

3. Summer Paddy: - In case of summer paddy production rates were higher in the last two decades i.e. percentage variation were 344.08% in 1961-62 over 1951-52 and 292.03% in 1971-72 over 1961-62. But in 1981-82 there was a decline in the production with a variation of 26.61%. After that again the production rate went high in subsequent.

4. Wheat: - In case of wheat production, the production rate has been in increasing trend since 1951-52 till 1981-82. Percentage of variation attained the peak of 136.31% in 1981-82 from the initial variation of 70.85% in 1961-62. But since 1991-92, the production rate has been going down continuously through more than two decades till 2013-14 and attained a variation of (-)16.77%.

5. Tur: - In case of Tur, the variation of production seems to be fluctuating throughout the decades and finally in decreasing trend.

6. Rape & Mustard: - The production attained the highest peak in 1991-93 with a percentage variation of 74.19% with the previous decade. But in 2001-02 there was a decline in the production with a variation of (-)22.86%. After that, again the production rate went high in subsequent years.

7. Potato: -The production is always in increasing trend since 1951-52 to 2013-14, though the decadal variation of production is not significant in last two decades than earlier three decades.

8. Sugarcane:- The production was in highest in 1981-82 but again slowed down in the subsequent years.

9. Jute:- Jute production attained the highest peak in 1971-72, but after that it was in decreasing trend till 2011-12 and then little higher in 2013-14 i.e. 17.97% higher than 2011

From the whole data it has been observed that the production of those crops which need more labour for their cultivation is in declining trend.
