

GOVERNMENT OF ASSAM

STATE / DISTRICT WISE AREA, PRODUCTION, PRICE AND VALUE OF TEN MAJOR CROPS IN ASSAM FROM 2003-04 TO 2012-13

(The Report prepared under 13th Finance Commission Grant.)

Directorate of Economics and Statistics, Assam
Jawaharnagar, Beltola, Guwahati-28

**STATE / DISTRICT WISE AREA, PRODUCTION, PRICE
AND VALUE
OF
TEN MAJOR CROPS IN ASSAM
FROM
2003-04 TO 2012-13**

(The Report prepared under 13th Finance Commission Grant.)

Directorate of Economics and Statistics, Assam
Government of Assam,
Guwahati-28

<FOREWORD>

The Directorate of Economics and Statistics, Assam has been conducting Crop Estimation Survey (CES) to estimate the Yield rate and Production of nine major crops starting with Winter Paddy, Autumn Paddy & Potato in 1950-51. However from 1974-75 onwards the CES has been conducted regularly for nine food and non-food crops to meet the Agricultural Statistics needs from time to time.

In this issue of the publication an effort has been made to depict and analyse the Area and Production of ten major crops including nine CES Crops for ten consecutive years w.e.f. 2003-04 to 2012-13 alongwith farm harvest prices and accrued values to estimate the contribution of each individual crop towards the Gross Domestic Product (GDP) of Assam. The analysis work was taken up under 13th Finance Commission Grants, 2013-14 of the Government of India.

I hope the report would be of immense help to the administrators, researchers, planners and academicians etc.

I appreciate the pain taken by officers and staff of the Agriculture Division in bringing out the publication.

Suggestions and comments for improvement of next issue of the publication are cordially solicited.

Dated : -29th June , 2015
Place : -Guwahati-28

1.) AREA, PRODUCTION, PRICE & VALUE OF TEN MAJOR CROPS

Tables-	Page No.
1.01 Area, Production, Price & Value of Autumn Paddy from 2003-04 to 2012-13	1-10
1.02 Area, Production, Price & Value of Winter Paddy from 2003-04 to 2012-13	11-20
1.03 Area, Production, Price & Value of Summer Paddy from 2003-04 to 2012-13	21-30
1.04 Area, Production, Price & Value of Jute from 2003-04 to 2012-13	31-40
1.05 Area, Production, Price & Value of Rape & Mustard from 2003-04 to 2012-13	41-50
1.06 Area, Production, Price & Value of Potato from 2003-04 to 2012-13	51-60
1.07 Area, Production, Price & Value of Wheat from 2003-04 to 2012-13	61-70
1.08 Area, Production, Price & Value of Matikalai from 2003-04 to 2012-13	71-80
1.09 Area, Production, Price & Value of Sugarcane from 2003-04 to 2012-13	81-90
1.10 Area, Production, Price & Value of Masur from 2005-06 to 2012-13	91-98

<INTRODUCTION>

Agriculture continues to play a predominant role in the Indian Economy both in terms of share in the National Income as well as the economic activity for a majority of the rural population. Even though, presently this primary sector's contribution in India's Gross Domestic Product is 12.7 percent during 2012-13 (new series 2011-12 at Current Prices), with a share of employment to around 70 percent of the total workforce and accounts for around 13.6 percent of the total value of the country's exports. The transition towards faster and more inclusive growth calls for significant thrust on Agriculture Sector.

The economy of Assam is predominantly agrarian in nature where agriculture sector continues to support more than 75 percent population of the state directly or indirectly by producing employment avenues to more than 50 percent of the total workforce of the state.

The farmers and the workforce engaged in agriculture activities has to encounter with adverse weather condition such as frequent flood and draught like situations along with lack of proper inputs in time, which affects the production and growth in this sector. The agriculture sector has registered a gradual decline in its contribution (GSDP at current 2004-05 prices) over the years from 2006-07 to 2012-13 towards state economy.

Assam, the eastern most state of the Indian Sub-Continent extends from 22⁰ 19' to 28⁰ 16' North Latitude and 89⁰ 42'to 96⁰ 30' East Longitude between the foothills of the Eastern Himalayas and the Patkai and Naga Hill ranges. There are mainly three types of soil quality across the state such as red loamy, lateritic and alluvial soil. Assam has an estimated Cultivable Land of 40.9 percent to the total Geographical Area and 87.5 percent of the Cultivable Land falls under Net Area sown. Rice is the predominant crop in the state along with some other important crops like pulses, jute, tea, sugarcane, potato, cotton, oil seeds, fruits crops, coconut, arecanut etc.

In Assam, Area and Land use Statistics are built up on the basis of the Land Records maintained by the Revenue Agencies. (Referred to as "Land Record Statistics" for temporarily settled state). But in the Hill Districts of Assam, where there is no agency for Area Enumeration, Area Statistics is based on the impressionistic approach.

The area, of main component of 37 major crops are finalised by the State committee on Agricultural Statistics (SCAS). The second most important component of Production is yield rates. The yield estimates of 9 principal crops are estimated through analysis of Crop Cutting Experiments (CCE) conducted under scientifically designed General Crop Estimation Survey (GCES) under the technical guidance of the Field Operation Division (FOD) of the National Sample Survey Office (NSSO). The objective of these surveys is to determine the yield rates of the crops and to estimate their production at district level and for the State as a whole with reasonable degree of precision. The CCEs consists of identification and marking of experimental plots of a specified size and shape in a selected field on the principle of random sampling, harvesting and threshing the produce and recording the harvested produce for determining the percentage recovery of dry grain on the marketable form of the produce.

Directorate of Economics and Statistics, Assam has been conducting CES to estimate the Yield and production statistics of nine major crops since 1950-51 (*Winter Paddy, Autumn Paddy & Potato from 1950-51, Jute from 1951-52, Sugarcane and Rape & Mustard from 1957-58, Black Gram from 1962-63, Wheat from 1973-74 and Summer Paddy from 1974-75*) From 1974-75 onwards Crop Estimation Survey has been conducted regularly for all the above mentioned food and non-food crops in the State by following the scientific method of Stratified Multistage Random Sampling method under the technical guidance of NSSO, (GOI).

It is an old adage that “Agriculture Price Mirror the Economy of a Country”. It is truer in the case of an agricultural country like India. Viewed from this angle, study of farm harvest prices along with area, yield and production is quite important.

In Assam no study has been carried out separately for these crops to ascertain how much values added to GSDP by these crops individually. Considering the importance of the matter, ten major crops have been identified and efforts have been made to prepare this report viz. –“State/District wise Area, Production, Price and values of ten major crops in Assam from 2003-04 to 2012-13”, with a set of tables from (1.01 to 1.10) where areas are finally approved by the State committee on Agricultural Statistics (SCAS). Productions are estimated from average Yield obtained by the General Crops Estimation Survey (GCES). Prices are the farm harvest price, and are collected in the peak harvesting period from different districts of the state. The report is prepared under the grants provided by the 13th finance Commission.

< Findings from the Tables >

From the tables depicted in the report it has been observed that during 2003-04, the highest area was covered by Winter Paddy 17,69,203 hectares followed by Autumn Paddy 4,41,142 hectares, Summer Paddy 3,19,480 hectares and Rape & Mustard 2,64,103 hectares. Accordingly Production of Winter Paddy was the highest which was 44, 26,729 tonnes with a highest contribution of value worth Rs. 2, 32,806 lakh the reference year followed by Jute and Sugarcane with a remarkable contribution of value amounting Rs. 79,152 lakh and Rs.42, 227 lakh respectively. Though the area under Jute (64,033 hectares) and Sugarcane (25,431 hectares) were in the 7th and 9th position among the ten reporting crops, it is noteworthy that Jute and Sugarcane accrued high values in that year.

In the year 2004-05 too with a coverage of 16,36,050 hectares area, Winter Paddy stood in top with a highest value of Rs. 2,20,632 lakhs. During the year under reference with a minimal value of Rs. 26,021 , lakh Autumn Paddy covered an area of 4,36,244 hectares. Jute added the second highest value of Rs. 61,749 lakh despite its area coverage of only 57,981 hectare. Sugarcane added 3rd highest value of Rs 57,215 lakh with a coverage of area of 23,942 hectare.

In 2005-06 also, Winter Paddy covered the highest area of 17,07,340 hectares followed by Autumn Paddy (3,98,316 hectare), Summer Paddy (3,14,671 hectares) and Rape & Mustard (2,12,471 hectares). The value accrued by Winter Paddy was the highest of Rs. 2,24,802 lakh during that year followed by Jute Rs. 1,17,717 lakh and Sugarcane Rs. 52,387 lakh.

In the year 2006-07, there was a significant decrease of area and production of Winter Paddy than that of the previous three years, the value had also decreased accordingly but it kept its highest position. During the year, Jute and Sugarcane accounted for second and third highest values among the ten crops.

During the period 2007-08 to 2012-13 Winter Paddy accounted the highest for both area and value. In case of Summer Paddy, both area and value were in increasing trend during this period. Though areas under Jute and Sugarcane cultivation were decreased

alarming, yet they occupied the 2nd and 3rd position in the value addition among the crops during that period.

It has been observed that Rape & Mustard occupied 4th position with a coverage of area of 2,64,003 hectares in 2003-04 to 2,79,496 hectare in 2012-13), and it occupied 7th position among the ten crops in respect of the value addition towards GSDP (which increased from Rs.24,069 lakh to Rs.43,097 lakh during the period of 2003-04 to 2012-13).

The area as well as value of Potato remained within 5th to 6th position during the period from 2003-04 to 2012-13 among the crops. Potato covered an area of 77,894 hect. to 95,436 hect. with a value accounted from Rs.30,870 lakh to Rs.97,816 lakh during the reporting period.

Area of Wheat decreases from 69,954 hectare to 33,984 hectare during the years from 2003-04 to 2012-13. With a increase in value, amounting Rs.4,997 lakh in 2003-04 to Rs.5,437 lakh in 2012-13, Wheat could not depict a satisfactory performance.

Area of Matikalai was increased from 39,588 hectares to 48,527 hectares and value has increased from Rs.2,525 lakh to Rs.9,465 lakh during 2003-04 to 2012-13.

However the lowest share of area and value were observed in respect of Masur during this period.

Among these 10 crops the trend of Area coverage and Value of 10 major crops of the State, during the period from 2003-04 to 2012-13 is presented in the following.

Contd.

**Area & Value arranged in descending order in respect
of 10 Major crops in Assam from 2003-04 to 2012-13**

Rank	Name of Crop	2003-04	Rank	Name of Crop	2003-04

% Contribution of Masur towards GSDP of Agri . sector

< Conclusion of the study >

It is evident from the study of the Area, Production, Price and Value of 10 major crops, that Winter Paddy has the highest area coverage and the highest production and consequently shared the highest contribution to the State's Economy.

The area of Autumn Paddy has a gradual decreasing during trend the reporting period while the area of Summer Paddy has been found to have increased substantially in the State. This may be the cause of less time span required for the crop from sowing to harvesting with a higher yield rate than Autumn Paddy. The area of Autumn Paddy is mainly confined in the districts of Udalguri, Sonitpur, Kokrajhar and Chirang. The cultivation of Summer Paddy is extensively carried out in Barpeta, Dhubri, Nagaon and Morigaon district.

From the point of view added towards GSDP, Jute and Sugar Cane have a high potential in the Agriculture Sector. But area coverage and production of these two crops have been decreasing gradually which may be due to comparatively a harder and labour cultivation procedure. Sugarcane plantation is time consuming and also needs plenty of water. Cultivation of Jute is mainly confined in Dhubri, Nagaon, Morigaon, Nalbari and Lakhimpur districts. Sugarcane cultivation is carried out mainly in the districts of Karbi Anglong, Nagaon, Sonitpur and Dima Hasao.

The area covered under Rape & Mustard has gradually been increasing during the period under study and the cultivation is mainly confined in the districts of Lakhimpur, Kokrajhar, Karbi Anglong and Barpeta which contribute a good share toward GSDP with its high priced oil seeds.

Extensive cultivation of Potato has been found in Lakhimpur, Barpeta, Sonitpur, Udalguri and Dhubri districts with a sound share towards GSDP during the reporting period.

So far the area covered under Wheat cultivation in the state is not encouraging excepting the districts of Barpeta, Bongaigaon, Morigaon and Dhubri for which the crop contributes a sizable value towards GSDP.

The cultivation of traditional cereal crops Matikalai and Masur, so far, could not impact any good result towards value addition in GSDP. The cultivation of Matikalai is

mainly confined in Dhubri, Barpeta, Jorhat and Sonitpur districts and the crop Masur is confined in the districts of Nalbari, Barpeta, Kamrup (rural), Darrang and Chirang.
