## DECLARATION

I hereby declare that the content embodied in the PhD thesis entitled "**Behavioural Study of Visco-Elastic Fluid Flow Characterized by Walters Liquid (Model B')**" is the result of research work carried out by me in the Department of Mathematics, The Assam Royal Global University, Guwahati, India, under the supervision of Dr. Kamal Debnath.

In keeping with the general practice of reporting research observations, due acknowledgments have been made wherever the work described is based on the findings of other researchers.

Further, I declare that this thesis as a whole or any part thereof has not been submitted to any university (or institute) for the award of any degree/ diploma.

## **CERTIFICATE FROM THE SUPERVISOR**

This is to certify that the work presented in the thesis entitled *Behavioural Study of Visco-Elastic Fluid Flow Characterized by Walters Liquid (Model B')* by Bikash Koli Saha, submitted to the Assam Royal Global University for the award of the degree of Doctor of Philosophy in **Mathematics**, is a record of the results obtained from the research work carried under my supervision.

This thesis conforms to the template and stipulated guidelines of the Assam Royal Global University, including the standard related to plagiarism, and has a plagiarism index of **5 %**, excluding the bibliography.

*Kamal Sebnath*

**Entire Document**

## ACKNOWLEDGEMENTS

I am extremely grateful and indebted to my Supervisor Dr. Kamal Debnath, Associate Professor & Head, Department of Mathematics, Royal School of Applied and Pure Sciences, The Assam Royal Global University, for his valuable advice, resourceful guidance and constant encouragement in compilation of this thesis.

I shall remain highly grateful towards Prof. (Dr.) Anuradha Devi, Dean, Royal School of Applied & Pure Sciences, The Assam Royal Global University, for believing me and encouraging me for this entire research work.

I would also like to thank all faculty members of Department of Mathematics, Royal School of Applied & Pure Sciences, The Assam Royal Global University, for their encouragement, love and valuable support during the progress of my research work.

I am always thankful to The Assam Royal Global University, the pioneer of higher education in north-east India for providing me all the necessary facilities to carry out my research work.

Lastly, I convey my gratitude towards my family, friends, without their support and encouragement it would have been certainly much harder to write this doctoral thesis.

**Thanks all of you**

# Abbreviations

$U(x)$	Main stream velocity
$u$	Velocity in the x-direction
$v$	Velocity in the y-direction
$\rho$	Fluid density
$\mu$	Coefficient of fluid viscosity
$\nu$	Kinematic viscosity
$\sigma$	Electrical conductivity of the fluid
$k_0$	Visco-elastic parameter
$B(x)$	Magnetic field
$B_0$	Constant Magnetic field
$k_1$	Non-Newtonian parameter
$M$	Magnetic parameter
$\eta$	Similarity variable
$U$	Stretching velocity
$U_0$	Reference velocity
$N$	Velocity slip factor
$N_1$	Initial value of velocity slip factor
$v_w$	Suction or blowing parameter
$V(x)$	Velocity of suction or blowing
$V_0$	Initial strength of suction or blowing
$\lambda$	velocity slip parameter
$S$	Modified Suction or blowing parameter
$\tau$	skin friction coefficient
$K$	Permeability parameter
$k^*$	Modified Permeability parameter
$\delta$	Velocity slip parameter
$\beta$	Thermal slip parameter
$Pr$	Prandtl parameter
$C$	Concentration
$C_w$	Plate concentration
$C_\infty$	Free stream concentration
$n$	Power-law exponent
$D$	Diffusion coefficient
$R_0$	Constant

$R(x)$	Variable reaction rate
$L$	Reference length
$Re_x$	Local Reynolds number
$Da_x$	Local Darcy number
$S_c$	Schmidt number
$\beta$	Thermal slip factor/ Reaction rate parameter
$C_p$	Specific heat
$T$	Temperature
$K$	Thermal conductivity of fluid
$T_w$	Plate temperature
$T_\infty$	Free stream temperature
$U_w$	Plate velocity/stretching parameter
$U_\infty$	Free stream velocity
$A$	Velocity ratio parameter
$A$	Unsteadiness parameter
$A$	Slip Length
$\Psi$	Stream function and
$T_0$	Rate of surface temperature
$c$	Stretching parameter
$a$	Straining parameter/velocity slip parameter
$G_1$	Velocity slip factor
$G_0$	Initial value of velocity slip factor
$H_1$	Thermal slip factor
$H_0$	Initial value of thermal slip factor
