

Table of Contents

Abbreviations and symbols	v-ix
List of Figures	xi-xiii
List of Tables	xv
1 Chapter 1	1-21
1.1 Medicinal plants	1-2
1.2 History of Medicinal plants	2-3
1.3 Natural products derived from medicinal plants	3-8
1.4 Essential oil derived from medicinal plants	8-9
1.5 Medicinal Plants as antimicrobial agents against <i>Staphylococcus aureus</i>	9-10
1.6 Production of Biofilm by <i>Staphylococcus aureus</i> and its mechanism of resistance	10-12
1.7 Methicillin resistant <i>Staphylococcus aureus</i> (MRSA) and its cause	12-14
1.8 Activity of medicinal plants against <i>S. aureus</i> and MRSA proteins	14-16
1.9 <i>In-silico</i> docking	17-18
1.10 Target identification and its importance	18-20
1.11 Drug formulation using natural products	20
1.12 Treatment of infection in animal model by formulated drug	21
Aim and objectives of the present study	22
Research objectives	22
2 Chapter 2	23-50
2.1 Medicinal plants	23
2.1.1 History of medicinal plants	23-26
2.2 Natural product	26-28
2.2.1 Natural product in drug discovery	28-29
2.2.2 Approval of natural products as new drug entities	29-31

2.2.3	Current status of natural product in clinical trials	31-32
2.3	MRSA and resistance mechanism	32-34
2.3.1	Prevalence of MRSA infection worldwide	34
2.3.2	Percentage of population affected by MRSA in India	34-36
2.3.3	Comorbidity	36-37
2.4	<i>In-silico</i> approach on drug discovery	37-42
2.5	Ointment formulation and its activity against wound healing	42-44
2.5.1	Animal model for <i>in-vivo</i> studies	44-49
3	Chapter 3	51-66
3.1	Selection of Medicinal plant	51
3.1.1	Classification of <i>Kaempferia galanga</i> Linn	51-52
3.2	Collection of plant material	52-53
3.3	Isolation of Essential oil	53
3.4	GC-MS analysis and identification of the compounds	54
3.5	Biochemical Analysis of essential oil	54
3.5.1	Total phenol content (TPC)	54
3.5.2	Total flavonoid content (TFC)	54
3.6	<i>In-vitro</i> free radical scavenging assay	54
3.6.1	2,2-diphenyl-1-picrylhydrazyl (DPPH) assay	55
3.6.2	2,2'-azino-bis (3-ethylbenzothiazoline-6-sulfonic acid) (ABTS•+) radical cation-based assay	55
3.6.3	Total Antioxidant Activity (TAC) assay (Phosphomolybdenum assay)	55-56
3.7	Haemolysis assay	56
3.8	Screening of medicinal plants for antibacterial activity	56
3.8.1	Test microorganism	56
3.8.2	Antibacterial activity by Agar well diffusion assay method	56-57
3.8.3	Minimum inhibitory concentration (MIC) of the essential oil	57
3.8.4	Antibiofilm assay of essential oil	57-58
3.9	<i>In-silico</i> investigation	58
3.9.1	Absorption, Distribution, Metabolism, Excretion, and Toxicity (ADMET) analysis	58
3.9.2	Molecular Docking	58-59

3.9.3	Molecular dynamics (MD) simulation	59
3.9.4	Binding free energy analysis	59-60
3.10	Ointment formulation	60-61
3.10.1	Physicochemical Evaluation of the Topical Formulation	61-63
3.11	Animal experimental model	63
3.11.1	Experimental rats	63
3.11.2	Skin irritancy	63-64
3.11.3	Acute dermal toxicity	64
3.11.4	Animal usage	64
3.11.5	Wound infection and dressing	65
3.11.6	Rate of wound healing	65
3.11.7	Histological studies	65
	Statistical analysis	66
4	Chapter 4	67-102
4.1	Selection of medicinal plant and isolation of essential oil	67
4.2	Characterization of essential oil	67-69
4.3	Phytochemical evaluation of the essential oil	70
4.4	Antioxidant activity (<i>In- vitro</i> radical scavenging assay)	70-73
4.5	Cytotoxicity analysis of essential oil	73-75
4.6	Antimicrobial screening	75
4.6.1	Well diffusion assay and Minimum Inhibitory Concentration	75-78
4.6.2	Antibiofilm inhibition	78-79
4.7	<i>In-silico</i> investigations of bioactive compounds	79
4.7.1	Absorption, Distribution, Metabolism, Excretion, and Toxicity (ADMET) analysis	79-81
4.7.2	Molecular docking assay	82-84
4.7.3	Molecular dynamics and simulation	84-86
4.7.3.1	Molecular Mechanics Generalized Born Surface Area (MM-GBSA) calculations	87-90
4.8	Formulation of topical ointment	91
4.8.1	Physicochemical standardisation of the topical ointment	91-92
4.9	Animal model study of the topical ointment	92

4.9.1	Skin irritancy	92-94
4.9.2	Dermal toxicity	92-94
4.9.3	Wound contraction rate	95-98
4.9.4	Histopathology study	98-103
5	Chapter 5	104-106
	Conclusion and Future Prospectives	104-106
	References	109-134
	Appendices	136-145
	List of Publication	146-147
	Institutional Animal Ethical Committee Certificate
